Early Architecture In New Mexico:

Early Architecture in New Mexico Bainbridge Bunting, 1976 This lavishly illustrated account of sixteen hundred years of New Mexico's architectural history is the first comprehensive treatment of the subject Emphasizing secular buildings noted architectural historian Bainbridge Bunting begins by describing the fourth century pithouses of the Basket Makers and goes on to examine the buildings of the Pueblo Indians and the architecture of the Spanish Colonial Mexican and Territorial New Mexican periods His discussion of Pueblo buildings covers material rarely dealt with in the study of architecture Bunting makes the reader aware not only of the evolutionary process in New Mexico architecture but also of the strong sense of continuity that characterizes it Although such events as the American takeover of the area in 1848 and the arrival of the railroad in 1880 led to major modifications in New Mexico's architectural repertoire pre American and pre Hispanic styles have survived as dominant architectural models The result of twenty five years of research this book grew out of a series of lectures delivered in 1973 to the Hispanic Preservation Division of the Graduate School of Architecture and Planning of Columbia University It will appeal not only to architects and historians but to general readers interested in touring or in duplicating examples of New Mexico's rich architectural heritage Cover [Early Architecture in New Mexico](#) Bainbridge Bunting, 1976 This lavishly illustrated account of sixteen hundred years of New Mexico's architectural history is the first comprehensive treatment of the subject Emphasizing secular buildings noted architectural historian Bainbridge Bunting begins by describing the fourth century pithouses of the Basket Makers and goes on to examine the buildings of the Pueblo Indians and the architecture of the Spanish Colonial Mexican and Territorial New Mexican periods His discussion of Pueblo buildings covers material rarely dealt with in the study of architecture Bunting makes the reader aware not only of the evolutionary process in New Mexico architecture but also of the strong sense of continuity that characterizes it Although such events as the American takeover of the area in 1848 and the arrival of the railroad in 1880 led to major modifications in New Mexico's architectural repertoire pre American and pre Hispanic styles have survived as dominant architectural models The result of twenty five years of research this book grew out of a series of lectures delivered in 1973 to the Hispanic Preservation Division of the Graduate School of Architecture and Planning of Columbia University It will appeal not only to architects and historians but to general readers interested in touring or in duplicating examples of New Mexico's rich architectural heritage Cover **Early Architecture in New Mexico** Bainbridge Bunting, 1976 This lavishly illustrated account of sixteen hundred years of New Mexico's architectural history is the first comprehensive treatment of the subject Emphasizing secular buildings noted architectural historian Bainbridge Bunting begins by describing the fourth century pithouses of the Basket Makers and goes on to examine the buildings of the Pueblo Indians and the architecture of the Spanish Colonial Mexican and Territorial New Mexican periods His discussion of Pueblo buildings covers material rarely dealt with in the study of architecture Bunting makes the reader aware not only of the evolutionary process in New Mexico

architecture but also of the strong sense of continuity that characterizes it. Although such events as the American takeover of the area in 1848 and the arrival of the railroad in 1880 led to major modifications in New Mexico's architectural repertoire, pre-American and pre-Hispanic styles have survived as dominant architectural models. The result of twenty-five years of research, this book grew out of a series of lectures delivered in 1973 to the Hispanic Preservation Division of the Graduate School of Architecture and Planning of Columbia University. It will appeal not only to architects and historians but to general readers interested in touring or in duplicating examples of New Mexico's rich architectural heritage.

Cover *New Mexico Style* Nancy Hunter Warren, 1986. Since its original publication, architects, builders, remodelers, and lovers of the distinctive architectural styles of Santa Fe and the region have depended on this book for its authoritative information and aesthetic inspiration.

The Missions of New Mexico Since 1776 John L. Kessell, 2012. In New Mexico, still a borderland possession of Spain in 1776, an unusually keen Franciscan observer, Fray Francisco Atanasio Dominguez, painted an extraordinarily detailed and often unflattering picture of the colony. A single source like no other that reveals life in raw, remote, late 18th-century New Mexico.

Architecture and Town Planning in Colonial North America James D. Kornwolf, Georgiana Wallis Kornwolf, 2002. Incorporating more than 3,000 illustrations, Kornwolf's work conveys the full range of the colonial encounter with the continent's geography, from the high forms of architecture through formal landscape design and town planning. From these pages emerge the fine arts of environmental design, an understanding of the political and economic events that helped to determine settlement in North America, an appreciation of the various architectural and landscape forms that the settlers created, and an awareness of the diversity of the continent's geography and its peoples. Considering the humblest buildings along with the mansions of the wealthy and powerful, public buildings, forts, and churches, Kornwolf captures the true dynamism and diversity of colonial communities, their rivalries and frictions, their outlooks and attitudes as they extended their hold on the land.

The Visual Dictionary of American Domestic Architecture Rachel Carley, 1997-03-15. Visual presentation of the many types of houses built in America, from the earliest Indian dwellings to designs for futuristic homes.

American Adobes Beverley Spears, 1997. A well-illustrated look at pitched-roof adobe houses.

Vernacular Architecture Henry Glassie, 2000-12-22. Based on thirty-five years of fieldwork, Glassie's *Vernacular Architecture* synthesizes a career of concern with traditional building. He articulates the key principles of architectural analysis and then centers his argument in the United States, but drawing comparative examples from many locations in Europe and Asia, he shows how architecture can be a prime resource for the one who would write a democratic and comprehensive history.

The Myth of Santa Fe Chris Wilson, 1997. Debunks the great tourist myth and explains how the Santa Fe architectural and design style, so popular with millions of visitors today, was consciously created by Anglos in the early 20th century.

The American Spirit in Architecture Talbot Hamlin, 1926.

A Field Guide to American Architecture Carole Rifkind, 1984. Incisive, jargon-free, and a pleasure to read. *A Field Guide to American Architecture*

presents an exceptionally comprehensive view of American architecture from the 1940s to the present. Plentiful photographs and graphic representations carefully interwoven with succinct text and informative captions make this volume ideal for browsing as well as serious study. Like Carole Rifkind's earlier book, this one investigates buildings by type, taking a fresh vantage point for each: houses, housing projects, public buildings, art museums, churches, and synagogues, schools and colleges, tall office buildings, and shopping centers. Encompassing the works of two hundred architects, from the little known to the famous, it builds a diverse and fascinating panorama of recent American architecture.

Facing Southwest Chris Wilson, 2001. *Facing Southwest* is a colourful exploration of the life and work of Santa Fe architect John Gaw Meem. Regarded as the leading southwest architect of his time, John Gaw Meem brought the Santa Fe style to its peak in the 1920s and 1930s. With original drawings, floor plans, and stunning colour photographs, this book explores Meem's signature design elements and numerous examples of his unique Spanish and Pueblo-influenced residences. It includes 176 colour and 100 black and white illustrations.

Paradise Valley, Nevada Howard W. Marshall, 1995. Stonemasons from the Alpine valleys of northwestern Italy shaped the architectural face of Paradise Valley in northern Nevada in the 1860s and 1870s. Drawing on their own distinctive skills, they constructed the constellation of granite and sandstone buildings that are the region's most visible landmarks. Marshall's analysis of this architectural legacy, illustrated with 229 photographs and 70 line drawings, is not only a valuable resource for scholars in vernacular architecture, folklore, and cultural geography, but also a verbal and visual treat for all who love the American West.

Architecture in Colonial America Marian Card Donnelly, 2003.

Native American Architecture Peter Nabokov, Robert Easton, 1989. *Native American Architecture* is the first book-length, fully illustrated study of North American Indian architecture to appear in a century. The product of 15 years of research by an architect and an anthropologist, the book presents the building traditions of the major tribes in nine regional profiles covering the continent, from the huge plank house villages of the Northwest Coast to the Moundbuilder towns and temples of the Southeast, to the Navajo hogans and adobe Pueblos of the Southwest. This innovative book is far more than a survey of buildings; its multidisciplinary approach offers a broad, clear view of the Native American world, resulting in a new understanding of the meaning of their buildings and culture. Nabokov and Easton describe how Indian buildings, as a central element of their culture, were the symbolic summation of tribal activity and how the settlements secured for their inhabitants a sense of place in the environment. Native American architecture, the authors write, must be defined as more than buildings, villages, or camps; the definition must include their use of space, their environment, their social mores, and their religious beliefs. The book thus introduces us to the ancient social customs, economic ways of life, and technological skills of each tribe, emphasizing the major role played by cosmological concepts and ritual life in their architectural systems. Each chapter concludes with an account of traditional Indian building practices under revival or in danger today. A visually exciting book, using historical photographs and drawings, architectural renderings, and specially prepared interpretive diagrams, which

decode the sacred cosmology of the principal housetypes Native American Architecture is a major contribution to the expanding worldwide interest in vernacular architecture a milestone in scholarly investigation and cultural reconstruction
