Planning Your Qualitative Research Thesis and Project Tom O'Donoghue, 2018-09-21 The new edition of *Planning Your Qualitative Research Thesis and Project* provides easily accessible worked examples and valuable models which can be used as guides for plans and proposals. By demonstrating the thought and forward planning that is required when proposing a credible interpretivist study, this book provides the reader with all the theory and practical understanding necessary to conduct a successful qualitative research project. This new edition provides examples of contemporary topics related to a range of countries across the developed and developing world and new chapters which include: An example of a perspectives study, Policy studies and the interpretivist paradigm, Life history studies, Interactionist historical studies, The interpretivist paradigm and research based on problem focused ideas. With chapters and studies providing contemporary and relevant examples, this new edition is the perfect introductory guide for students looking to complete their first qualitative thesis project. Bridging the gap between theory and practice, it is an accessible introduction and an invaluable resource for early stage doctoral students and for students undertaking research and enquiry.

Planning Your Qualitative Research Project Tom O'Donoghue, 2006-10-30 This is a key text for any student embarking on a qualitative research project. It provides worked examples and valuable models which can be used as guides for plans and proposals, answering key questions and providing a comprehensive guide to a student's project. It shows that when planning a qualitative research proposal, researchers should adopt an approach where they ask themselves the following four questions: What research paradigm informs my approach to my research area? What theoretical perspective do I choose within the paradigm? What methodology do I choose? What methods are most appropriate? Including examples of the write up of two central types of research projects: studies on participants' perspectives on phenomena and studies on how participants manage or cope with phenomena, the book outlines five research proposals to illustrate ways in which these two central types can be varied and applied when engaging in five other types of studies: namely policy studies, life history studies, retrospective interactionist longitudinal studies and interactionist historical studies and problem focused studies.

The Idea-Driven Organization Dean M. Schroeder, Alan G. Robinson, 2014-03-31 Most companies, if they solicit employee ideas at all, essentially just set up a suggestion box which employees know from experience is where ideas go to die. So nothing happens. But innovation is not an option; it's the key to survival. And innovation needs new ideas. So where are those ideas going to come from? Using numerous examples, Robinson and Schroeder argue that the employees who interact directly with your customers, make your products and provide your services are in the best position to see where problems exist and what improvements and new offerings would have the most impact. Robinson and Schroeder explain how leaders can build the kind of idea-driven company capable of implementing fifty to a hundred or more ideas per employee per year. Drawing on their work with companies worldwide, they show what's needed to put together a management team open to grassroots innovation and describe the strategies

policies and practices that encourage and those that discourage employee ideas They detail exactly how high performing idea processes work and how to design one customized for your organization including advice for teaching people how to come up with new ideas The best ideas may come from the bottom but they have to be systematically solicited from the top **Idea**
