Boon, 2012-01-01 Ultimately I propose that considering internalization as embodiment is a critical methodological shift in understanding mystical methods in general and especially for probing recollection mysticism in depth The inner man as opposed to the outer man is a Pauline and Lutheran commonplace that is too frequently taken out of context leading historians of the Renaissance in general and of Spanish Renaissance religion in particular to value references to internal or mental methods of spirituality as an improvement over external or bodily rituals This book takes its cue from the recent cognitive turn in medieval studies that complicates studies of the body in religion by focusing on the embodied aspects of cognition claiming a continuum between body and soul rather than a hierarchy I argue that medieval theories of cognition made the divorce of the body from the soul impossible for a Galenic doctor even one who spoke of the body and the world with contempt and by implication impossible for his Castilian audience Without serious consideration of Laredo s reliance on an embodied soul rather than on a body soul dualism therefore no proper assessment of the unitive stage of recogimiento can be made Introduction p 6 7 **K.R. Matthews,1998-07-02 Donald Matthews affirms once and for all the African foundation of African American religious practice His analysis of the methods employed by historians social scientists and literary critics in the study of African American religion and the Negro spiritual leads him to develop a methodology that encompasses contemporary scholarship without compromising the integrity of African American religion and culture Because the Negro spiritual is the earliest extant body of African American folk religious narration Matthews believes that it holds the key to understanding African American religion He explores the works of such seminal black scholars as W E B DuBois Melville Herskovits and Zora Neale Hurston tracing the early development of the African centered approach to the interpretation of African American religion This approach involves cultural structuralism the author s term for the method used by DuBois Herskovits and Hurston that emphasizes the thick reading of narrative expressions Such a reading allows the scholar to identify the cultural significance of particular oral and written texts and serves as a point of identification and a cultural link between African and African American religion Matthews close analysis of the spiritual employs a dialectical and postmodernist reading and reveals a religious philosophy that addresses the deepest concerns and desires of Africans in America These concerns are cultural political and psychological but are ultimately related to African religious structures of meaning This book poses a challenge to end the battle between Afrocentrists and multiculturalists by acknowledging their common intellectual heritage in the works of DuBois Herskovits and Hurston It will be of great interest to students and scholars of African American religion and culture and those interested in Afrocentric literature
