

Type 2 diabetes in adults: choosing medicines

Factors to take into account when choosing, reviewing and changing medicines

Prescribing guidance

Rescue therapy

For symptomatic hyperglycaemia, consider insulin or a sulfonylurea and review when blood glucose control has been achieved.

Diet and lifestyle advice

At each point reinforce advice about diet and lifestyle.

Choosing treatments

Base the choice of medicine on:

- the person's individual clinical circumstances, for example comorbidities, contraindications, weight, and risks from polypharmacy
- the person's individual preferences and needs
- the effectiveness of the drug treatments in terms of metabolic response and cardiovascular and renal protection
- safety (see [MHRA guidance](#), the BNF and individual SPCs) and tolerability of the drug treatment
- monitoring requirements
- the licensed indications or combinations available
- cost (if 2 drugs in the same class are appropriate, choose the option with the lowest acquisition cost)

Reviewing and changing treatments

At each point, think about and discuss the following with the person:

- stopping medicines that are not tolerated
- stopping medicines that have had no impact on glycaemic control or weight, unless there is an additional clinical benefit, such as cardiovascular or renal protection, from continued treatment
- how to optimise their current treatment regimen before thinking about changing treatments, taking into account factors such as:
 - adverse effects
 - adherence to existing medicines
 - the need to revisit advice about diet and lifestyle
 - prescribed doses and formulations
- whether switching rather than adding drugs could be effective

High risk of cardiovascular disease

Adults with type 2 diabetes who have:

- QRISK2 more than 10% in adults aged 40 and over or
- an elevated lifetime risk of cardiovascular disease (defined as the presence of 1 or more cardiovascular risk factors in someone under 40).

Cardiovascular disease risk factors: hypertension, dyslipidaemia, smoking, obesity, and family history (in a first-degree relative) of premature cardiovascular disease.

Drugs Are Nice

G Thomas

Drugs Are Nice:

Drugs Are Nice Lisa Crystal Carver, 2025-10-07 In this eye opening memoir Lisa Crystal Carver recalls her extraordinary youth and charts the late 80s early 90s punk subculture that she helped shape She recounts how her band Suckdog was born in 1987 and the wild events that followed leaving small town New Hampshire to tour Europe at 18 becoming a teen publisher of fanzines a teen bride and a teen prostitute Spin has called Suckdog s album *Drugs Are Nice* one of the best of the 90s and the book includes photos of infamous European shows Yet the book also tells of how Lisa saw the need for change in 1994 when her baby was born with a chromosomal deletion and his father became violent With lasting lightness and surprising gravity *Drugs Are Nice* is a definitive account of the generation that wanted to break every rule but also a story of an artist and a mother becoming an adult on her own terms

Drugs are Nice Lisa Carver, 2006 The 31 year old married mother from Dover may well be the country s supreme cultural anthropologist part literary provocateur part social analyst She s been called everything from this decade s ultimate underground Renaissance woman to America s horniest optimist Hunter S Thompson in a miniskirt *Wired* magazine

Drugs Are Nice Lisa Crystal Carver, 2006 Talks about the generation that wanted to break every rule An account of rules broken left intact and re written forever this book talks about an artist and a mother becoming an adult on her own terms

The human rights of older people in healthcare Great Britain: Parliament: Joint Committee on Human Rights, 2007-08-13 Looks at how the principles of human rights can be applied to older people in hospitals and care homes to ensure they are treated with greater dignity and respect This report covers the leadership of the Department of Health the implementation of the Human Rights Act by service providers

Medical Proofs, Social Experiments Catherine Will, Tiago Moreira, 2016-04-22 Clinical trials have become key technologies for decision making in the contemporary world Their results shape medical practice and determine priorities across health care systems but the work that goes into producing credible data is often hidden *Medical Proofs Social Experiments* draws upon detailed case studies to argue that to understand their value we need to pay more attention to the contexts for these modern medical experiments recovering the diverse ways in which they involve doctors patients and the public the local practices that contribute to their completion and the complex negotiation of their results in professional and statutory institutions Presenting research from the UK USA Sweden and The Netherlands the ethnographic perspective adopted by the authors provides a space to explore the investments of different state market professional and other actors in particular forms of evaluation and the ways in which trial methodologies may be re designed or re imagined to satisfy social and political expectations As such this volume will be of interest to those working in the fields of science and technology studies the sociology and anthropology of medicine and researchers of policy and organisation in health care
