Drugs In Hispanic Communities:

Drugs in Hispanic Communities Ronald Glick, Joan W. Moore, 1990 This anthology details the origins extent and solutions for drug use and trafficking in Latino communities The chapters focus on various stages of distributing drugs addiction and selling and curing the abuse prevention and counseling Several Latino subpopulations are emphasized as well adolescents women The contributors have various writing styles Some of the work was number crunching others were historical or merely descriptive AIDS was a backdrop to the discussion there was one AIDS focused chapter and a few chapters ended with the topic However the overlap of drug use and prostitution or male to male sex in the AIDS spread was not brought up I found that kinda disappointing This book was compiled over a decade ago and it may be dated The use of Hispanic rather than Latino is an example of this fact The book differentiates and highlights Mexicans Puerto Ricans and Cubans Though other Latino groups may feel left out I applaud this goal to recognize ethnic distinctions within the Latino population Though there were some Spanish surnamed authors I get the sense that this was mostly Anglo writing on the Latino populations This may feel a bit colonizing to some readers Still I am glad there s a book out there that documents the problem and the cure amongst this racial minority group

The Demographics of Drug Abuse in Hispanic Communities Emily Gantz McKay, 1990

Handbook for Conducting Drug Abuse Research with Hispanic Populations Robert C. Freeman, Yvonne P. Lewis, Héctor Manuel Colón, 2002 This volume with accompanying CD ROM is a compendium of information providing practical guidelines for individuals doing drug abuse research with Hispanic populations Aimed at graduate students and researchers or service providers initiating programs with Hispanic communities it also provides ample substance for seasoned researchers The material is drawn from the field work of countless investigators who in the course of conducting drug abuse research targeted at the Hispanic population have designed studies collaborated with communities conducted outreach recruited participants developed and tested instruments collected and analyzed data followed up with clients and considered ways of returning something to the community after their research was completed The CD ROM provides not only the volume s electronic text but also decision tree scenarios of each major component activity to initiate and conduct research with Hispanic populations This handbook was written largely because many drug abuse researchers in the 1980s and 90s operated under the assumption that the methods and approaches useful with non Hispanic subjects could also be utilized with Hispanics That approach ignored such moderating variables as acculturation language and core values As a consequence the benefits of research findings did not always accrue to Hispanics This volume contributes significantly to filling this gap in drug abuse research
