Handbook of Cross-Cultural and Multicultural Personality Assessment Richard H. Dana, 2000-02-01 Throughout the world as in the United States psychologists are increasingly being called upon to evaluate clients whose backgrounds differ from their own It has long been recognized that standard personality and psychopathology assessment instruments carry cultural biases and in recent years efforts to correct these biases have accelerated The Handbook of Cross Cultural and Multicultural Personality Assessment brings together researchers and practitioners from 12 countries with diverse ethnic and racial identities and training to present state of the art knowledge about how best to minimize cultural biases in the assessment of personality and psychopathology They consider research methodology the design and construction of standard objective and projective tests the use of measures of acculturation racial identity and culture specific tests the social etiquette of service delivery and the interpretation of test data for clinical diagnosis Ranging widely through all the relevant issues they share a common collective vision of how culturally competent services should be delivered to clients The Handbook offers the first comprehensive view of a consistent approach to cultural competence in assessment a necessary precursor of effective intervention It will become an indispensable reference for all those whose practice or research involves individuals with different ethnic and racial identities

**Character** Guy Axtell, 2000-04-26 There have been many books over the past decade including outstanding collections of essays on the topic of the ethical virtues and virtue theoretic approaches in ethics But the professional journals of philosophy have only recently seen a strong and growing interest in the intellectual virtues and in the development of virtue theoretic approaches in epistemology There have been four single authored book length treatments of issues of virtue epistemology over the last seven years beginning with Ernest Sosa's *Knowledge in Perspective* Cambridge 1991 and extending to Linda Zabzebski's *Virtue of the Mind* Cambridge 1996 Weighing in with Jonathan Kvanvig's *The Intellectual Virtues and the Life of the Mind* 1992 and James Montmarquet's *Epistemic Virtue and Doxastic Responsibility* 1993 Rowman Littlefield has had a particularly strong interest in the direction and growth of the field To date there has been no collection of articles directly devoted to the growing debate over the possibility and potential of a virtue epistemology This volume exists in the belief that there is now a timely opportunity to gather together the best contributions of the influential authors working in this growing area of epistemological research and to create a collection of essays as a useful course text and research source Several of the articles included in the volume are previously unpublished Several essays discuss the range and general approach of virtue theory in comparison with other general accounts What advantages are supposed to accrue from a virtue based account in epistemology in handling well known problems such as Gettier and Evil Genie type problems Can reliabilist virtue epistemology handle skeptical challenges more satisfactorily than non virtue centered forms of epistemic reliabilism Others provide a needed discussion of relevant analogies and disanalogies between ethical and epistemic evaluation The readings all contribute to our understanding of the relative importance for a theory of justified belief of the reliability of our cognitive faculties and of the individual's responsibility in gathering and weighing evidence Highlights of the readings include direct exchanges between leading exponents of this approach and their critics In addition the volume includes contributions from feminist writers who offer a reassessment of the intellectual virtues from within their own research paradigm
