Figlio,Cecilia Elena Rouse,2008 We study the effects of the threat of school vouchers and school stigma in Florida on the performance of low performing schools using student level data from a subset of districts Estimates of the change in school level high stakes test scores from the

first year of the reform are consistent with the early results used by the state of Florida to claim large scale improvements associated with the threat of voucher assignment However we also find that much of this estimated effect may be due to other factors While we estimate a small relative improvement in reading scores on the high stakes test for voucher threatened stigmatized schools we estimate a much smaller relative improvement on a lower stakes nationally norm referenced test Further the relative gains in reading scores are explained largely by changing student characteristics We find more evidence for a positive differential effect on math test scores on both the low and highstakes tests however the results from the lower stakes test appear primarily limited to students in the high stakes grade Finally we find some evidence that the relative improvements following the introduction of the A Plan by low performing schools were more due to the stigma of receiving the low grade rather than the threat of vouchers Abstract [Proceedings American Society for Engineering Education. Regulatory Fit from Stereotype Threat: Enhancing Women's Leadership Aspirations Anke Görzig,2008-11-11 Doctoral Thesis Dissertation from the year 2008 in the subject Psychology Social Psychology grade magna cum laude University of Mannheim Fakultät für Sozialwissenschaften Lehrstuhl für Mikrosoziologie und Sozialpsychologie language English abstract A series of studies investigates the impact of regulatory fit on women's leadership aspirations A regulatory fit occurs when an outcome is presented in gain frames under a promotion focus and in loss frames under a prevention focus Combining research on regulatory focus and research on stereotype threat it is argued that regulatory fit may result from stereotype threat loss frame under a prevention focus and from the absence of stereotype threat gain frame under a promotion focus In line with previous research it is proposed that regulatory fit enhances motivation Studies 1 and 2 and b creates a feeling right experience that increases the persuasiveness of external stimuli Study 3 In all three experiments regulatory fit was operationalized as experiencing stereotype threat when under a prevention focus or respectively experiencing the absence of stereotype threat when under a promotion focus Further women's aspirations to engage in a leadership role were assessed In Studies 1 and 2 it was shown that women's motivation to occupy a leadership role was enhanced in the regulatory fit conditions compared to women in the nonfit conditions Study 3 demonstrated that a stimulus i.e role model was more persuasive under regulatory fit Women experiencing regulatory fit compared to women in the nonfit conditions were more persuaded by role models showing more interest in a leadership role when confronted with a positive model and less interest when confronted with a negative model These studies show that stereotype threat can elicit regulatory fit which in turn affects women's leadership aspirations Future directions and limitations are discussed [Enhancing Math A Through Cooperative Learning and Authentic Applications](#) Katherine Marie Bell,1993 *Press Summary - Illinois Information Service* Illinois Information Service,2002-08
