## **Borderlands Under Streb International Boundary Studies Series:**

**Borderlands under Stress** Martin Pratt, 2000-07-19 Confronting governments the energy industry in this increasingly complex area Contributors also discuss a range of ideas for overcoming boundary related problems which are hindering the development of energy resources in various parts of the world The papers in this volume represent the proceedings of the fourth international conference of the International Boundaries Research Unit IBRU held at the University of Durham on 18-19 July 1996 IBRU works to enhance the resources available for the peaceful resolution of problems associated with international boundaries on land at sea around the world including their demarcation management **Understanding Life in the Borderlands** I. William Zartman, 2010-01-25 The past two decades have seen an intense interdisciplinary interest in the border areas between states inhabited territories located on the margins of a power center or between power centers This timely and highly original collection of essays edited by noted scholar I William Zartman is an attempt to begin to understand both these areas and the interactions that occur within and across them that is to understand how borders affect the groups living along them and the nature of the land and people abutting on and divided by boundaries These essays highlight three defining features of border areas borderlanders constitute an experiential and culturally identifiable unit borderlands are characterized by constant movement in time space and activity and in their mobility borderlands always prepare for the next move at the same time that they respond to the last one The ten case studies presented range over four millennia and provide windows for observing the dynamics of life in borderlands They also have policy relevance especially in creating an awareness of borderlands as dynamic social spheres and of the need to anticipate the changes that given policies will engender changes that will in turn require their own solutions Contrary to what one would expect in this age of globalization says Zartman borderlands maintain their own dynamics and identities and indeed spread beyond the fringes of the border and reach deep into the hinterland itself **Borderlands Resilience** Dorte Jagetic Andersen, Eeva-Kaisa Prokkola, 2021-12-28 This book offers new insights into the current highly complex border transitions taking place at the EU internal and external border areas as well as globally It focuses on new frontiers and intersections between borders borderlands and resilience developing new understandings of resilience through the prism of borders The book provides new perspectives into how different groups of people and communities experience adapt and resist the transitions and uncertainties of border closures and securitization in their everyday and professional lives The book also provides new methodological guidelines for the study of borders and multi sited bordering and resilience processes The book bridges border studies and social scientific resilience research in new and innovative It will be of interest to students and scholars in geography political studies international relations security studies and anthropology **Globalizing Borderlands Studies in Europe and North America** John W.I. Lee, Michael North, 2016-12-01 Borderlands are complex spaces that can involve military religious economic political and cultural interactions all of which may vary by region and over time John W I Lee and

Michael North bring together interdisciplinary scholars to analyze a wide range of border issues and to encourage a nuanced dialogue addressing the concepts and processes of borderlands Gathering the voices of a diverse range of international scholars Globalizing Borderlands Studies in Europe and North America presents case studies from ancient to modern times highlighting topics ranging from religious conflicts to medical frontiers to petty trade Spanning geographical regions of Europe the Baltics North Africa the American West and Mexico these essays shed new light on the complex processes of boundary construction maintenance and crossing as well as on the importance of economic political social ethnic and religious interactions in the borderlands Globalizing Borderlands Studies in Europe and North America not only forges links between past and present scholarship but also paves the way for new models and approaches in future borderlands research

**Challenged Borderlands** Vera Pavlakovich-Kochi, Barbara J. Morehouse, 2017-03-02 In the early 1990s borders within Europe and between the United States and Mexico began to open The increasing flow of goods capital ideas and people across boundaries promised to reduce physical and cognitive distances Simultaneously challenges to identity have arisen within and between the European nation states driven not only by internal cultural and political dynamics but also by processes of globalization Concurrently the US Mexican border emerged in public consciousness as a location of new opportunities largely due to public perception of the benefits of the North American Free Trade Agreement NAFTA This book explores some of the contradictory yet simultaneous processes affecting border regions A team of leading scientists offers a wide range of perspectives on global national regional and local processes and provides a useful matrix for understanding their complex multilayered implications Key concepts such as globalization borders and identities are illustrated through local and regional case studies

**Borderlands** Gesellschaft für die Neuen Englischsprachigen Literaturen. Annual Conference, 1999 Boundaries borderlines limits on the one hand and rites of passage contact zones in between spaces on the other have attracted renewed interest in a broad variety of cultural discourses after a long period of decenterings and delimitations in numerous fields of social psychological and intellectual life Anthropological dimensions of the subject and its multifarious ways of world making represent the central challenge among the concerns of the humanities The role of literature and the arts in the formation of cultural and personal identities theoretical and political approaches to the relation between self and other the familiar and the foreign have become key issues in literary and cultural studies forms of expressivity and expression and question of mediation as well as new enquiries into ethics have characterized the intellectual energies of the past decade The aim of Borderlands is to represent a variety of approaches to questions of border crossing and boundary transgression approaches from different angles and different disciplines but all converging in their own way on the post colonial paradigm Topics discussed include globalization cartography and ontology transitional identity ecocritical sensibility questions of the application of post coloniality gender and sexuality and attitudes towards space and place As well as studies of the cinema of the settler colonies the films of Neil Jordan and Othering in Canadian sports journalism there are

treatments of the Nigerian novel South African prison memoirs and African women s writing Authors examined include Elizabeth Bowen Bruce Chatwin Mohamed Choukri Nuruddin Farah Jamaica Kincaid Pauline Melville Bharati Mukherjee Michael Ondaatje and Leslie Marmon Silko

*European Borderlands* Elisabeth Boesen, Gregor Schnuer, 2016-11-10 The expectations of European planners for the gradual disappearance of national borders and the corresponding prognoses of social scientists have turned out to be over optimistic Borders have not disappeared not even in a unified and predominantly peaceful Europe but rather they have changed become more varied and in a certain sense mobile taking on an important role in the everyday lives of more people than ever before Furthermore it is now widely accepted that borders do not just hinder communication and the formation of relationships but also channel and prefigure them in a positive way Presenting a number of studies of everyday life in European borderlands this book addresses the multifarious and complex ways in which borders function as both barriers and bridges Focusing on established Western European borderlands with the exception of three contrasting cases the book attempts a turn from conflict to harmony in the study of borderlands and thus examines the more mundane manifestations of border life and the complex often unconscious motives of everyday cross border practices The collection of chapters demonstrates that even in the case of open political borders the border remains an enduring factor that is not adequately described as either a problematic barrier or a desirable bridge The studies look at bordering processes not only approaching them from different disciplinary angles sociology anthropology geography history political science and literary studies but also choosing different scales and making comparisons that range from different borders of one country to the reactions and attitudes of different individuals in a single borderland village

*Borderlands* Hastings Donnan, Thomas M. Wilson, 2010-04-16 Borderlands are often seen as zones of instability uncertainty marginality and danger Yet they increasingly attract the attention of ethnographers as a unique lens through which to view the intersections of the national transnational and global forces that shape the securities and insecurities of our globalizing age The contributors to this volume examine how different kinds of insecurity manifest and interconnect at state borders encompassing the personal and the political the social and the economic in ways that reinforce or undermine the identities of those whose lives these borders frame Drawing upon case studies from the Southern Cone the U S Mexico border and borders in Greece Ireland and southeast Asia the authors show that borders raise questions of security not just for those who live and cross them including ethnographers but also for the sustainability of the physical environments and wildlife disturbed by the passage movement and containment borders generate

*Securitized Borderlands* Martin Deleixhe, Magdalena Dembińska, Julien Danero Iglesias, 2021-05-13 Borders are both a door and a bridge Because they are operating at a critical juncture between security expectations and intense cross border exchanges they appear to be Janus faced To some they are demarcating lines that call for extensive protection and a regime of strict closure To others they are a gateway to transnational opportunities and their opening should be carefully but liberally managed The very same paradox affects the regions located alongside borders that

is the borderlands or frontier zones Borderlands can be simultaneously depicted as epitomizing the growth of mutually beneficial transnational ties and as offering a privileged but bleak glimpse into the importation of international threats into domestic politics Partly due to the discrepancy between their premises borderlands studies and security studies have virtually no dialogue Security studies remain focused on the discriminatory function of the border while borderlands studies document the social dynamics of cross border societies Against this backdrop the ambition and originality of *Securitized Borderlands* lie in its aim to theoretically and empirically fill the gap between security studies that remain focused on the discriminatory function of the border and borderlands studies that document the social dynamics of cross border societies The chapters in this book were originally published as a special issue of the *Journal of Borderlands Studies* *Children, Young People and Borders* Machteld Venken, Virpi Kaisto, Chiara Brambilla, 2022-05-11 This edited volume increases knowledge about children and young people living in borderlands passing through borders and de constructing borders as well as highlights the potential of studying how children and young people imagine act cross and inhabit symbolic and material borders The study of borders and borderlands is growing extensively but the experiences of children and young people in the turmoil of border changes and border crossings remain under researched Adopting a multidisciplinary approach this edited volume has a twofold objective to increase knowledge about children and young people living in borderlands passing through borders and de constructing borders and to highlight the potential of studying how children and young people imagine act cross and inhabit symbolic and material borders with the aim of advancing the theoretical and empirical debate within border studies The chapters in this book were originally published as a special issue of the *Journal of Borderlands Studies* **Beyond Walls: Re-inventing the Canada-United States Borderlands** Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations **Borderlands** MONIKA REIF. HULSER, 1999 *Borderlands* Hastings Donnan, Thomas M. Wilson, 2012-07-10 Borderlands are often seen as zones of instability

uncertainty marginality and danger Yet they increasingly attract the attention of ethnographers as a unique lens through which to view the intersections of the national transnational and global forces that shape the securities and insecurities of our globalizing age The contributors to this volume examine how different kinds of in security manifest and interconnect at state borders encompassing the personal and the political the social and the economic in ways that reinforce or undermine the identities of those whose lives these borders frame Drawing upon case studies from the Southern Cone the U S Mexico border and borders in Greece Ireland and southeast Asia the authors show that borders raise questions of security not just for those who live and cross them including ethnographers but also for the sustainability of the physical environments and wildlife disturbed by the passage movement and containment borders generate

**Borderlines and Borderlands** Alexander C. Diener,Joshua Hagen,2010-01-16 From our earliest schooldays we are shown the world as a colorful collage of countries each defined by

their own immutable borders What we often don't realize is that every political boundary was created by people No political border is more natural or real than another yet some international borders make no apparent sense at all While focusing on some of these unusual border shapes this fascinating book highlights the important truth that all borders even those that appear normal are social constructions In an era where the continued relevance of the nation state is being questioned and where transnationalism is altering the degree to which borders effectively demarcate spaces of belonging the contributors argue that this point is vital to our understanding of the world The unique and compelling histories of some of the world's oddest borders provide an ideal context for this group of experts to offer accessible and enlightening discussions of cultural globalization economic integration international migration imperialism postcolonialism global terrorism nationalism and supranationalism Each author's regional expertise enriches a textured account of the historical context in which these borders came into existence as well as their historical and ongoing influence on the people and states they bound To view more maps from the David Rumsey Map Collection visit [www.davidrumsey.com](http://www.davidrumsey.com) Contributions by Eric D Carter Karen Culcasi Alexander C Diener Joshua Hagen Reece Jones Robert Lloyd Nick Megoran Julian V Minghi David Newman Robert Ostergren and William C Rowe *Border Politics in a Global Era* Kathleen Staudt, 2017-06-16 Initially research in border studies relied mainly on generalizations from cases in the US Mexico borderlands before subsequently burgeoning in Europe *Border Politics in a Global Era* seeks to expand the study further to include the post colonial South in response to the major challenge of interdisciplinary border studies to explore borderlands in many contexts with and across a variety of states including the so called developing post colonial states Culled from decades of firsthand observations of borders from around the world and written with a critical and gender lens the text is framed with attention to history geography and the power of films and travelogues to represent people as others Professor Kathleen Staudt advances border concepts categories and theories to focus on trade migration and security highlighting the importance of states their length of time since independence and border bureaucrats discretionary practices Drawing on her Border Inequalities Database for a global perspective Staudt calls for reducing inequalities and building institutions in the common grounds of borderlands The book features maps and other visuals with lists of links at the close of most chapters Broadly comparative in nature *Border Politics in a Global Era* will appeal not only to students of border studies it will also stimulate attention in comparative politics international studies and political geography *Borderlands Research Monograph Series* Joint Border Research Institute (Las Cruces, N.M.), 1985 [Boundaries and Place](#) David H. Kaplan, Jouni Häkli, 2002-10-16 Examining contemporary cultural and political changes in Europe as they are reflected in the region's borderlands this in depth analysis combines the classical heritage of boundary studies with a profound understanding of the social construction of borders The book employs a rich variety of perspectives on globalization the rise of national and ethnic identities contemporary European integration and the enlargement of the EU The contributors pay particular attention to the role of geographical scale identity history and social

and economic contexts in the dynamic evolution of European borderlands Throughout the book explores how borderlands are experienced by ordinary people and employed by institutional actors in charge of cross border cooperation Visit our website for sample chapters *Post-Soviet Borders* Sabine von Löwis, Beate Eschment, 2022-08-18 This book investigates how borders in former Soviet Union territories have evolved and shifted in the thirty years since the end of the Cold War The collapse of the Soviet Union in 1991 led to fifteen independent states and numerous de facto states but this process of rebordering is not finished and social economic infrastructural cultural and political networks and spaces continue to develop This book explores the intersection between these geopolitical shifts and the individual lived experience drawing on cases from across border regions in the Caucasus Central Asia and Eastern Europe Throughout the book introduces and frames the case studies with well informed theoretical conceptual and methodological overviews that situate them within border studies in general and post Soviet border spaces in particular Overall the book demonstrates that like a kaleidoscope the dynamic elements in these newly evolved border regions are similar yet strikingly different in their juxtapositions with the appearance of new configurations often dependent on changing geopolitical constellations This timely guide to the post Soviet world thirty years after the Cold War will be of interest to researchers across border studies politics geography social anthropology history Eastern European Studies Central Asian Studies and Caucasian Studies
