Borders Of Chinese Civilization:

Borders of Chinese Civilization, 2009 DVD R Howland explores China's representations of Japan in the changing world of the late nineteenth century and in so doing examines the cultural and social borders between the two neighbors. Looking at Chinese accounts of Japan written during the 1870s and 1880s he undertakes an unprecedented analysis of the main genres the Chinese used to portray Japan: the travel diary, poetry, and the geographical treatise. In his discussion of the practice of *brush-talk* in which Chinese scholars communicated with the Japanese by exchanging ideographs, Howland further shows how the Chinese viewed the communication of their language and its dominant modes—history and poetry—as the textual and cultural basis of a shared civilization between the two societies. With Japan's decision in the 1870s to modernize and westernize, China's relationship with Japan underwent a crucial change, one that resulted in its decisive separation from Chinese civilization and, according to Howland, a destabilization of China's worldview. His examination of the ways in which Chinese perceptions of Japan altered in the 1880s reveals the crucial choice faced by the Chinese: whether to interact with Japan as kin, based on geographical proximity and the existence of common cultural threads, or as a barbarian, an alien force molded by European influence. By probing China's poetic and expository modes of portraying Japan, *Borders of Chinese Civilization* exposes the changing world of the nineteenth century and China's comprehension of it. This broadly appealing work will engage scholars in the fields of Asian studies, Chinese literature, history, and geography, as well as those interested in theoretical reflections on travel or modernism.

academic world which comprehensively expounds the new methodology of humanities The quadruple evidence method is one which integrates quadruple evidences to open up new horizon for interpretation of ancient culture in the three dimensional manner The first layer of evidence refers to documents passed down from the past the second layer of evidence refers to local written materials the third layer of evidence includes oral legends of anthropology and folklore and etiquette in the living folk customs the fourth layer of evidence refers to those ancient objects and images either unearthed in archaeological excavations or handed down from the past The book consists of theoretical explorations and their applications in individual cases While the first part studies the academic evolution theory and methodological value of the quadruple evidence method the second part in using the method in different cases explores different historical and cultural phenomena in the history of China attempting to extend the frontier of the origin of civilization from the approach of mythological study *Hegemony with Chinese Characteristics* Asim Doğan,2021-05-20 *Hegemony with Chinese Characteristics* compares the historical relationship of China with its neighbours to the developing trajectory of the Belt and Road Initiative and asks what this tells us about the kind of hegemon China is likely to become China is going to play a more active and decisive role in the international community and there is much uncertainty about how China will handle its responsibilities and interests The ambiguous and assertive Belt and Road Initiative is a matter of special concern in this aspect The Tributary System which provides concrete evidence of how Chinese dynasties handled relations with foreigners is a useful reference point in trying to understand its twenty first century developments This is particularly true because after the turbulence of the Century of Humiliation and the Maoist Era China seems to be explicitly re embracing its history and its pre revolutionary identity Confucius one of the biggest targets of the Cultural Revolution is being rehabilitated alongside Confucianism Taoism Buddhism and other ideologies and philosophies suppressed in the Mao era Do an analyzes the extent to which China s current approach to foreign relations resembles its earlier models Grounded in hegemony as an analytic lens this book provides an innovative study of the power generated by the global rise in China It will be a valuable resource for scholars and students of Chinese foreign policy and international relations and serve as a benchmark for further studies A Short History of Chinese Civilization Richard Wilhelm,1929 *Journal of the West China Border Research Society* ,1923
