**Born, Not Made** James L. Fisher, James V. Koch, 2008-09-30 Books magazine articles and educational programs on entrepreneurship are all based on the idea that anyone can be an entrepreneur that entrepreneurs are made not born Well maybe not In a study of 234 CEOs funded by the Kauffman Foundation James L Fisher and James V Koch came up with a surprising conclusion Some individuals are simply more naturally fitted to become entrepreneurs than others They are pre wired Because of heredity some people are much more likely to become successful entrepreneurs or pursue entrepreneurial strategies within a corporate setting profitably By recognizing that this book will significantly improve corporate selection processes strengthen entrepreneurship programs and boost the confidence of aspiring entrepreneurs through invaluable insights Among other things Fisher and Koch show that true entrepreneurs not only see the world differently they act differently Compared with corporate managers for example they are more confident more decisive more likely to upset the apple cart and more energetic They love to compete but are notable for the partnerships they are able to fashion with friend and foe alike Such conclusions are remarkable Why Because they are based on the only empirical comparison study yet conducted on entrepreneurship The insights are not based on personal opinion or case studies but on valid and reliable personality indicators Because the book shows that certain kinds of people will find it much easier to found successful companies than others it has many practical applications It will help organizations fit the right people into jobs requiring an entrepreneurial bent It will challenge corporations to hire entrepreneurial CEOs who will transform businesses rather than maintain the status quo And it will speak directly to entrepreneurs and those contemplating starting a business who will learn if they have the right stuff to start and sustain a business In short this book provides insights into the entrepreneurial soul that can change the fortunes of individuals and companies for the better

**Creating Born Criminals** Nicole Hahn Rafter, 1997 But Creating Born Criminals is much more than a look at the past It is an exploration of the role of biological explanation as a form of discourse and of its impact upon society While The Bell Curve and other recent books have stopped short of making eugenic recommendations their contentions point toward eugenic conclusions and people familiar with the history of eugenics can hear in them its echoes Rafter demonstrates that we need to know how eugenic reasoning worked in the past and that we must recognize the dangers posed by the dominance of a theory that interprets social problems in biological terms and difference as biological inferiority
