Born To Play Life And Career Of Hazel Harrison:

Born to Play Jean E. Cazort, Constance T. Hobson, 1983-04-29 The life of a great musician is always interesting but the story of Hazel Harrison is exceptional Her achievement was particularly impressive because she had been schooled entirely at home and was the first black pianist male or female to perform with a major European orchestra Harrison s extraordinarily long and impressive performing career spanned more than half a century from the days when Brahms was still alive and Stravinsky had not yet composed The Rite of Spring to the time of the civil rights struggle in the deep South [Blind Tom, the Black Pianist-composer \(1849-1908\)](#) Geneva H. Southall, 1999 Blind Tom was the stage name of Thomas Greene Wiggins a blind black pianist born into slavery in 1849 In this focused consequential study Southall reformulates the debate surrounding Blind Tom and expands its dimensions significantly

From Chords to Simultaneities Nachum Schoffman, 1990-04-20 One of the momentous events in twentieth century music was the advent of atonality and serialism and the consequent proliferation of such avant garde genres as total serialism electronic music and aleatory music This book examines serialism and its progeny formulates criteria that are applicable both to serialism and to the traditional harmony from which it developed and focuses on the failure of serialism to solve the problem of coherent harmonic progression Rather than seeking to denounce serialism the work attempts to restore a balance by questioning whether its esteem is justified In this work Schoffman applies the criterion of the degree of indeterminacy of the chords to both traditional functional harmony and to serial and avant garde music Consequently serialism and avant garde music are placed in a historical perspective and evaluated in terms of their chordal behavior The study is divided into four separate sections examining the indeterminacy of progression the indeterminacy of members of chords chords in serial music and destructive aspects of indeterminacy Also included is an extensive list of musical examples a guide to references and a comprehensive index With its correlations to literature

painting and history this volume will be an important addition to academic and public libraries university music departments and academies of music as well as a valuable resource for courses in music theory and analysis esthetics of music and music history

A Most Wondrous Babble Nicholas E. Tawa,1987-05-15 Tawa considers the musical and social ramifications influencing the American composer between 1950 and 1985 He draws information from composers music reviewers and from his own listening experiences Tawa s common theme is the gulf between what the composer or critic says about the music and how the public experiences it More than 50 composers are considered Tawa goes beyond biographical detail to help the reader to understand the reasons for the deep abyss separating contemporary composer and listener Choice The decades following World War II witnessed an explosion of musical creativity in America Unfortunately they also witnessed a widening abyss between the contemporary composer and his or her audience Confusion on the part of the modern listener is an all too frequent phenomenon when he or she is confronted by the extraordinary profusion of contemporary musical styles This useful volume is intended to relieve some of that confusion Insightful commentaries and a highly readable text combine to focus on all contemporary musical styles from the most traditional to the most experimental in relation to modern American life Taking the position that music is a transaction between creator composer and listener the author considers ways in which each faction may become more aware of the other s imperatives thereby sponsoring a new and mutually meaningful music
