**Memory, Wisdom, and Healing** Gabrielle Hatfield,1999 This vivid and detailed picture of the use of domestic remedies in Britain from c 1700 to the present recaptures a lost world of folk knowledge Its fresh readable style with extensive use of oral history letters diaries and personal answers such provocative questions on the use of healing plants and alternative medicine as Was this domestic medicine a mixture of myth and magic or was it simply an empirical first aid system Was it largely self treatment or were local experts involved and if so did money change hands What was the interaction between official medicine and domestic medicine and were the same plants used in both Memory Superstition and Healing draws on oral history and manuscript sources to record for posterity this neglected aspect of our heritage Much of the information has never been published before **Official Gazette of the United States Patent and Trademark Office** ,2006 **Healing with Plants in the American and Mexican West** Margarita Artschwager Kay,1996-07-01 Disenchanted with biomedicine and dismayed by its cost increasing numbers of people are seeking alternative therapies such as the healing plants discussed in this book Plant medicine is a billion dollar business health food stores small yerberias and even giant grocery store chains carry hundreds of medicinal herbs By one estimate up to one third of the U S population uses alternative medicine generally in addition to conventional therapy and commonly without telling their doctors The heart of this volume is a complete description of 100 plants commonly used today often for the same purposes reported by chroniclers of the Aztecs or eighteenth century European explorers Information for each plant includes botanical and common plant names history contemporary uses a description of how the plant is prepared and administered and brief phytochemical data Discussions of folk efficacy and folk properties beliefs in how and why the herb heals help to explain the continued use of each plant into the present day Are any of these plants dangerous and do any of them really work Where did they come from and where are they available now How can health care practitioners gain the confidence of their patients to learn whether they are using alternative medicines for specific illnesses symptoms or injuries Perhaps most intriguing which of these plants might be

waiting to take the place of known antibiotics as pathological organisms become increasingly resistant to modern miracle drugs. Answers to these and other questions will pique the interest of general readers and will be an invaluable resource for health care providers especially nurses and other primary care providers who often must find an interface between biomedical and more traditional therapies. For all readers the book opens a window into many ethnic cultures of the region: Mexican American communities, desert Pima, coastal Seri and others. Here is the fascinating saga of how their healing plants from prehistoric times melded with Old World herbs brought by the Europeans to create the unique pharmacopoeia available today here and in other parts of the world. Botanical Entanglements Anna K. Sagal, 2022-08-18. To this day women face barriers in entering scientific professions and in earlier eras the challenges were greater still. But in Botanical Entanglements Anna Sagal reveals how women's active participation in scientific discourses of the eighteenth century was enabled by the manipulation of social and cultural conventions that have typically been understood as limiting factors. By taking advantage of the intersections between domesticity, femininity and nature the writers and artists studied here laid claim to a specific authority on naturalist subjects ranging from botany to entomology to natural history more broadly. Botanical Entanglements pairs studies of well known authors: Eliza Haywood, Charlotte Lennox, Maria Edgeworth and Charlotte Smith with authors and artists who receive less attention in this context: Priscilla Wakefield, Maria Jacson, Elizabeth Blackwell, Henrietta Maria Moriarty and Mary Delany to offer a nuanced portrait of the diverse strategies women employed to engage in scientific labor. Using socially acceptable forms of textual production including popular periodicals, didactic texts, novels, illustrated works, craftwork and poetry these women advocated for more substantive and meaningful engagement with the natural world. In

parallel the book also illuminates the emotional and physical intimacies between women plants and insects to reveal an early precursor to twenty first century theorizing of plant intelligence and human plant relationships Recognizing such literary and artistic entanglement facilitates a more profound understanding of the multifaceted relationship between women and the natural world in eighteenth century England

**Of Books and Botany in Early Modern England** Leah Knight, 2016-12-05

Contemplating the textual gardens poetic garlands and epigrammatic groves which dot the landscape of early modern English print Leah Knight exposes and analyzes the close configuration of plants and writing in the period She argues that the early modern cultures and cultivation of plants and books depended on each other in historically specific and novel ways that yielded a profusion of linguistic conceptual metaphorical and material intersections Examining both poetic and botanical texts as well as the poetics of botanical texts this study focuses on the two outstanding English botanical writers of the sixteenth century William Turner and John Gerard to suggest the unexpected historical relationship between literature and science in the early modern genre of the herbal In depth readings of their work are situated amid chapters that establish the broader context for the interpenetration of plants and writing in the period s cultural practices in order to illuminate a complex interplay between materials and discourses rarely considered in tandem today

**Herbal and Magical Medicine** James K. Kirkland, Holly F. Matthews, Charles W. Sullivan III, Karen Baldwin, 1992-01-30

Herbal and Magical Medicine draws on perspectives from folklore anthropology psychology medicine and botany to describe the traditional medical beliefs and practices among Native Anglo and African Americans in eastern North Carolina and Virginia In documenting the vitality of such seemingly unusual healing traditions as talking the fire out of burns wart curing blood stopping herbal healing and rootwork the contributors to this volume demonstrate how the region s folk medical systems operate in tandem with scientific biomedicine The authors provide illuminating commentary on the major forms of naturopathic and magico religious medicine practiced in the United States Other essays explain the persistence of these traditions in our modern technological society and address the bases of folk medical concepts of illness and treatment and the efficacy of particular practices The collection suggests a model for collaborative research on traditional medicine that can be replicated in other parts of the country An extensive bibliography reveals the scope and variety of research in the field Contributors Karen Baldwin Richard Blaustein Linda Camino Edward M Croom Jr David Hufford James W Kirland Peter Lichstein Holly F Mathews Robert Sammons C W Sullivan III
