

PURPOSE

The purpose of my project is to see how plants grow.

HYPOTHESIS

I think plants grow with sunlight and water.

REPORT

[A printed report page is pinned to the left side of the display board, containing text and a small image.]

PLANT'S

Vocabulary

PROCEDURE

Prepare the greenhouse dome, add the seeds inside and water them. Make sure you don't water them too much. Leave the dome closed until the

first sprouts appear. Place the greenhouse near the window to keep the seeds warm and bright.

MATERIALS

Seeds, water, sunlight, plant, food.

RESULTS

When I put water in, my plants started to grow, but I had to be careful not to water them too much. I also had to check the temperature to make sure it was not too hot or cold for the plants.

Greenhouse allows for greater control over the growing environment of plants, depending upon the technical specification of a greenhouse. Any factors that can be controlled include temperature, levels of light and shade, irrigation, fertilizer application and atmospheric humidity.

Did you know that...

A miniature greenhouse is known as a cold frame. A greenhouse is a building in which plants are grown. A greenhouse is a structural building with different materials such as a glass or plastic. This is not the same as the greenhouse effect.

CONCLUSION

My hypothesis was correct. Plants need water and sunlight to grow.
