Machines for Making Gods Jon Bialecki, 2022-03-01 The Mormon faith may seem so different from aspirations to transcend the human through technological means that it is hard to imagine how these two concerns could even exist alongside one another let alone serve together as the joint impetus for a social movement *Machines for Making Gods* investigates the tensions between science and religion through which an imaginative group of young Mormons and ex-Mormons have found new ways of understanding the world The Mormon Transhumanist Association MTA believes that God intended humanity to achieve Mormonism's promise of theosis through imminent technological advances Drawing on a nineteenth century Mormon tradition of religious speculation to reimagine Mormon eschatological hopes as near future technological possibilities they envision such current and possible advances as cryonic preservation computer simulation and quantum archeology as paving the way for the resurrection of the dead the creation of worlds without end and promise of undergoing theosis of becoming a god Addressing the role of speculation in the anthropology of religion *Machines for Making Gods* undoes debates about secular transhumanism's relation to religion by highlighting the differences an explicitly religious transhumanism makes Charting the conflicts and resonances between secular transhumanism and Mormonism Bialecki shows how religious speculation has opened up imaginative horizons to give birth to new forms of Mormonism including a particular progressive branch of the faith and even such formations as queer polygamy The book also reveals how the MTA's speculative account of God and technology together has helped to forestall some of the social pressure that comes with apostasy in much of the Mormon Intermountain West A fascinating ethnography of a group with much to say about crucial junctures of modern culture *Machines for Making Gods* illustrates how the scientific imagination can be better understood when viewed through anthropological accounts of myth

Geometry with an Introduction to Cosmic Topology Michael P. Hitchman, 2009 The content of *Geometry with an Introduction to Cosmic Topology* is motivated by questions that have ignited the imagination of stargazers since antiquity What is the shape of the universe Does the universe have an edge Is it infinitely big Dr Hitchman aims to clarify this fascinating area of mathematics This non-Euclidean geometry text is organized into three natural parts Chapter 1 provides an overview including a brief history of Geometry Surfaces and reasons to study Non-Euclidean Geometry Chapters 2-7 contain the core mathematical content of the text following the Erlangen Program which develops geometry in terms of a space and a group of transformations on that space Finally chapters 1 and 8 introduce chapter 1 and explore chapter 8 the topic of cosmic topology through the geometry learned in the preceding chapters

Science and Spirit Angelo Parodi, 2005-08 Can educated people embrace the concepts of spirituality mysticism paranormal phenomena and even magic in light of the overwhelming and undeniable tenets of modern science As revealed in this book the answer is a resounding yes *Science and Spirit* takes the reader on a step by step journey through the often startling world of modern physics showing how recent scientific evidence not only supports but in many cases demands an

acceptance of spiritual mystical and paranormal principles If you like many modern people have yearned to believe in something beyond the mundane day to day physicality of life but have feared that to do so would be tantamount to intellectual suicide this book will prove that you need not choose between modern certainty and mystical doctrine for both are completely consistent

Real Scientists Don't Wear Ties Sidney Perkowitz,2019-07-30 Real Scientists Don't Wear Ties links science to general and popular culture and everyday life in an easy to understand style When a gifted writer of science selects his best pieces published in the world's most reputable periodicals such as Nature Discover and MIT Technology Review we get an eminently readable collection of his varied work in book form That it covers all time relevant topics like quantum physics gravitational waves genetic engineering space exploration and artificial intelligence is an added delight Prof Perkowitz also discusses how science can be found in medical practice cooking soccer and art and also science and science fiction in the media On the lighter side he reports on his efforts to teach a computer to understand poetry explains why scientists resist dressing up and shows that unlike many people scientists actually enjoy math
