Selected Papers of E. B. Dynkin with Commentary Evgeniï Borisovich Dynkin, Gary M. Seitz, 2000 Eugene Dynkin is a rare example of a contemporary mathematician who has achieved outstanding results in two quite different areas of research algebra and probability In both areas his ideas constitute an essential part of modern mathematical knowledge and form a basis for further development Although his last work in algebra was published in 1955 his contributions continue to influence current research in algebra and in the physics of elementary particles His work in probability is part of both the historical and the modern development of the topic This volume presents Dynkin s scientific contributions in both areas Included are commentary by recognized experts in the corresponding fields who describe the time place role and impact of Dynkin s research and achievements Biographical notes and the recollections of his students are also featured Advances in Applied Mathematics and Approximation Theory George A. Anastassiou, Oktay Duman, 2014-07-08 Advances in Applied Mathematics and Approximation Theory Contributions from AMAT 2012 is a collection of the best articles presented at Applied Mathematics and Approximation Theory 2012 an international conference held in Ankara Turkey May 17 20 2012 This volume brings together key work from authors in the field covering topics such as ODEs PDEs difference equations applied analysis computational analysis signal theory positive operators statistical approximation fuzzy approximation fractional analysis semigroups inequalities special functions and summability The collection will be a useful resource for researchers in applied mathematics engineering and statistics **Geometric and Spectral Analysis** Pierre Albin, Dmitry Jakobson, Frédéric Rochon, 2014-12-01 In 2012 the Centre de Recherches Math matiques was at the center of many interesting developments in geometric and spectral analysis with a thematic program on Geometric Analysis and Spectral Theory followed by a thematic year on Moduli Spaces Extremality and Global Invariants This volume contains original contributions as well as useful survey articles of recent developments by participants from three of the workshops organized during these programs Geometry of Eigenvalues and Eigenfunctions held from June 4 8 2012 Manifolds of Metrics and Probabilistic Methods in Geometry and Analysis held from July 2 6 2012 and Spectral Invariants on Non compact and Singular Spaces held from July 23 27 2012 The topics covered in this volume include Fourier integral operators eigenfunctions probability and analysis on singular spaces complex geometry K hler Einstein metrics analytic torsion and Strichartz estimates This book is co published with the Centre de Recherches Math matiques *Solvability of Nonlinear Singular Problems for Ordinary Differential Equations* Irena Rachunkova, Svatoslav Stanek, Milan Tvrdy, 2009 **Boundary Value Problems of Mathematical Physics** Ivar Stakgold, 1969 **A Course of Higher Mathematics** V. Monogenic Functions in Spaces with Commutative Multiplication and Applications Sergiy A. Plaksa,Vitalii S. Shpakivskyi,2023-07-18 This monograph develops a theory of continuous and differentiable functions called monogenic functions in the sense of Gateaux functions taking values in some vector spaces with commutative multiplication The study of these monogenic functions in various commutative algebras leads to a discovery of new ways of solving boundary value problems in mathematical physics The book consists of six parts Part I presents some preliminary notions and introduces various concepts of differentiable mappings of vector spaces Part II V is devoted to the study of monogenic functions in various spaces with commutative multiplication namely three dimensional commutative algebras with two dimensional radical finite dimensional commutative associative algebras infinite dimensional vector spaces associated with the three dimensional Laplace equation and infinite dimensional vector spaces associated with axial symmetric potential fields Part VI presents some boundary value problems for axial symmetric potential fields and develops effective analytic methods of
