Child Health The Community:

Child Health and the Community Courtenay Dinwiddie, 1931 *Community Child Health* Jean C. Fahey, John G. Heilman, Judith S. Palfrey, Sean Palfrey, 1995-10-30 Community Child Health is designed to orient physicians nurses social workers public health officers and allied professionals to the world of children and to help them devise practice styles and priorities in concert with the current needs of children Palfrey's central thesis is that society has lost sight of children and as a result we have done a very poor job of structuring the environment to nurture them as they grow Ironically communities are breaking apart just at the time when families need them the most leaving children vulnerable confused and isolated The health consequences include poor school performance behavioral problems injuries early sexuality drug and alcohol use weapons possession homicide and suicide The medical professions can have a major impact in reversing these social and health problems Palfrey has designed this book to equip such professionals with the conceptual frame data base and practical tips and tools that will result in improved results in the growth and development of children It is an advocate's manual a cookbook for the program planner and a guide for the child health professional seeking improvements in community child care

The Goal of May Day American Child Health Association, 1928 [Focusing on Children's Health](#) National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Board on Population Health and Public Health Practice, Roundtable on Health Disparities, 2009-09-24 Socioeconomic conditions are known to be major determinants of health at all stages of life from pregnancy through childhood and adulthood Life course epidemiology has added a further dimension to the understanding of the social determinants of health by showing an association between early life socioeconomic conditions and adult health related behaviors morbidity and mortality Sensitive and critical periods of development such as the prenatal period and early childhood present significant opportunities to influence lifelong health Yet simply intervening in the health system is insufficient to influence health early in the life course Community level approaches to affect key determinants of health are also critical Many of these issues were raised in the 1995 National Academies book *Children's Health the Nation's Wealth* The present volume builds upon this earlier book with presentations and examples from the field *Focusing on Children's Health* describes the evidence linking early childhood life conditions and adult health discusses the contribution of the early life course to observed racial and ethnic disparities in health and highlights successful models that engage both community factors and health care to affect life course development
