Child Psychology Today:

How to Help Your Child Clean Up Their Mental Mess Dr. Caroline Leaf, 2023-08-08 Every Parent's Guide to Supporting Their Child's Mental Health Increasingly children ages 3-10 are struggling with anxiety, depression, and mental health challenges. These can be brought on by many factors: stress at home, upheavals in society, breaks in routine, isolation from friends, bullying, or social pressure. And if left unaddressed, they follow kids into their teens and adulthood, causing mental, emotional, and relational problems that will steal their peace and joy. But there is hope. Bestselling author Dr. Caroline Leaf helps you teach your kids how to recognize negative feelings and respond in a healthy way, navigate a world that can feel scary and overwhelming, manage uncomfortable or challenging situations, replace toxic thoughts with brain-building practices that produce better outcomes, develop resilience, and emotional strength. Based on up-to-date research, clearly illustrated with case studies, and practically applied to the problems kids are facing today, *How to Help Your Child Clean Up Their Mental Mess* is what parents, caretakers, teachers, and counselors have been waiting for. Dr. Leaf shares a clear and effective five-step plan to teach your child how to manage their mind so they can live a life with greater resilience, health, and happiness.

Stearns, 2025-09-18 *The American Child* is an essential history that recounts changes in American childhood. This authoritative book challenges the view that the problems facing today's kids are simply the product of social media, video games, the internet, the breakdown of the family, and the decline of marriage. Instead, showcasing larger changes in the

American economy and culture and the relationship between society and government after World War II *Humane Helping* Eric Maisel, 2017-10-12 *Humane Helping* is a comprehensive practical guide that helps clinicians shift their practice from the mental disorder and chemical fix and expert talk models to a more humane helpful model that increases their ability to help clients meet life's challenges and reduce emotional distress. Chapters clearly explain the shortfalls of the current models and the advantages of Eric Maisel's model and include case studies, reflection questions, and actionable steps. Written for helping professionals in mental health as well as practitioners from fields such as coaching and nursing, *Humane Helping* challenges current practices and provides helpers with the tools they need to more compassionately, effectively, and honestly serve their clients.

[Reset Your Child's Brain](#) Victoria L. Dunckley, MD, 2015-06-23 Increasing numbers of parents grapple with children who are acting out without obvious reason. Revved up and irritable, many of these children are diagnosed with ADHD, bipolar illness, autism, or other disorders but don't respond well to treatment. They are then medicated, often with poor results and unwanted side effects. Based on emerging scientific research and extensive clinical experience, integrative child psychiatrist Dr. Victoria Dunckley has pioneered a four-week program to treat the frequent underlying cause, Electronic Screen Syndrome (ESS). Dr. Dunckley has found that everyday use of interactive screen devices such as computers, video games, smartphones, and tablets can easily overstimulate a child's nervous system, triggering a variety of stubborn symptoms. In contrast, she's discovered that a strict, extended electronic fast single-handedly improves mood, focus, sleep, and behavior, regardless of the child's diagnosis. It also reduces the need for medication and renders other treatments more effective. Offered now in this book, this simple intervention can produce a life-changing shift in brain function and help your child get back on track, all without cost or medication. While no one in today's connected world can completely shun electronic stimuli, Dr. Dunckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them. **Child Psychology Today** Elizabeth Hall, Michael E. Lamb, Marion Perlmutter, 1982 **Virginia Libraries** Leslie Wallace Stevens, 1928 **Of Children** Guy R. Lefrançois, 1986 This accessible, chronologically organized text introduces the major topics, issues, terminology, and theories in child and adolescent development. Lefrançois is known for his friendly, student-oriented writing, which includes personal anecdotes that bring the material to life in a unique and involving way. The author stresses the application of the concepts of developmental psychology to students' career and educational goals. A major emphasis in the new edition is the importance of the contexts, relationship within which children develop, with special attention to cross-cultural and multicultural issues. The new edition represents a major rethinking of the text with five new emphases, as well as a thorough updating throughout the text. [Seven Psychological Portraits](#) Mabel Lee Cooper, 1928 *Reasonable Children* Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it's dispelled. Building upon his provocative ideas in *On Becoming Responsible*, Michael Pritchard clears

the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education
