Childhood In Contemporary Cultures:

Childhood in Contemporary Cultures, 1963 *Childhood in Contemporary Cultures. Edited by M. Mead and M. Wolfenstein* Margaret Mead, Martha WOLFENSTEIN, 1955 **Childhood in Contemporary Cultures** Margaret Mead, Martha Wolfenstein, 1955 Fourteen essays illustrate a number of ways in which children can be studied and show how materials made by for or about children can be analyzed for the better understanding of child rearing **Learning in Contemporary Culture** Will Curtis, Alice Pettigrew, 2009-05-18 This book provides an accessible undergraduate level introduction to the central educational concepts of learning and culture In examining these themes it addresses key issues including what is meant by culture characteristics commonly associated with contemporary culture relationships between culture and learning changing understandings of how what where and when we learn the relationship between learning national identity and citizenship and the impact of all these on our way of life today These ideas are approached from historical philosophical sociological political and psychological perspectives the traditional disciplines of Education Studies

Contemporary Perspectives on Childhood and Adolescence Namita Ranganathan, 2025-01-29 This book offers fresh perspectives on childhood adolescence human diversity and learning With novel theoretical backing of Indian research studies that confirm bolster extend or challenge established theories it explores connections between prevailing ideas in educational psychology and the issues relevant to young learners of today Authored by leading scholars and practitioners of Indian education the volume covers a wide range of topics including early childhood care and education sociocultural philosophical and psychological perspectives on childhood and adolescence contemporary lifestyle changes and concerns about diversity These concerns range from multilingualism and gender to intelligence and the development of self and identity Structured in terms of historical progression each chapter offers a theoretical context emphasizing contemporary perspectives within the specific area of focus Additionally independent research studies are integrated into the chapters to provide a comprehensive framework of the addressed issues rather than existing as standalone research papers A valuable resource relevant to multiple disciplines this book caters to educators researchers and teacher trainers as well as students of Education Psychology Counselling Development Studies Social Work and Sociology It s also a useful tool for parents policymakers and governmental and non governmental organizations involved in education The Figure of the Child in Contemporary Evangelicalism Anna Strhan, 2019-09-26 What does it mean to grow up as an evangelical Christian today What meanings does childhood have for evangelical adults How does this shape their engagements with children and with schools And what does this mean for the everyday realities of children s lives Based on in depth ethnographic fieldwork carried out in three contrasting evangelical churches in the UK Anna Strhan reveals how attending to the significance of children within evangelicalism deepens understanding of evangelicals hopes fears and concerns not only for children but for wider British society Developing a new relational approach to the study of children and religion Strhan invites the reader to consider both

the complexities of children's agency and how the figure of the child shapes the hopes, fears, and imaginations of adults within and beyond evangelicalism. *The Figure of the Child in Contemporary Evangelicalism* explores the lived realities of how evangelical Christians engage with children across the spaces of church, school, home, and other informal educational spaces in a de-Christianizing cultural context: how children experience these forms of engagement and the meanings and significance of childhood. Providing insight into different churches, contemporary cultural and moral orientations, the book reveals how conservative evangelicals experience their understanding of childhood as increasingly countercultural, while charismatic and open evangelicals locate their work with children as a significant means of engaging with wider secular society. Setting out an approach that explores the relations between the figure of the child, children's experiences, and how adult religious subjectivities are formed in both imagined and practical relationships with children, this study situates childhood as an important area of study within the sociology of religion and examines how we should approach childhood within this field, both theoretically and methodologically.

Art and Education in Contemporary Culture Irving Kaufman, 1966

Youth Culture and Identity in Northern Thailand Anjalee Cohen, 2020-06-02

Youth Culture and Identity in Northern Thailand examines how young people in urban Chiang Mai construct an identity at the intersection of global capitalism, state ideologies, and local culture. Drawing on over 15 years of ethnographic research, the book explores the impact of rapid urbanisation and modernisation on contemporary Thai youth, focusing on conspicuous youth subcultures, drug use (especially methamphetamine use), and violent youth gangs. Anjalee Cohen shows how young Thai people construct a specific youth identity through consumerism and symbolic boundaries, in particular through enduring rural-urban distinctions. The suggestion is that the formation of subcultures and deviant youth practices such as drug use and violence are not necessarily forms of resistance against the dominant culture, nor a pathological response to dramatic social change as typically understood in academic and public discourse. Rather, Cohen argues that such practices are attempts to fit in and stick out in an anonymous urban environment. This volume is relevant to scholars in Thai Studies, Southeast Asian Studies, Anthropology, Sociology, Urban Studies, and Development Studies, particularly those with an interest in youth, drugs, and gangs.

Childhood and Children's Culture Flemming Mouritsen, Jens Qvortrup, 2002 For over a decade sociologically oriented childhood research and research on child culture have experienced a dramatic growth within the humanities and the social sciences as well as an increasing prominence at the institutional level This book is the meeting place of two closely related fields of research childrens culture and the history of childhood on the one hand and the sociology and anthropology of childhood on the other The two camps share a joint methodological view of children as agents in their own lives environments and even in society at large yet it is also agreed that their lives and welfare are largely formed by adults and the society in which they live Both research areas have been vital for the development of new strands of childhood research which are in many ways characterised by a departure from more conventional approaches concepts and understandings that have dominated childhood research and childhood itself in much of the 20th century The articles in the book represent numerous aspects of the two areas of research In a critical vein the sociologically and anthropologically oriented contributions cover studies of structural aspects of childhood as well as qualitative studies of childrens everyday life while the culturally oriented contributions comprise classical studies of childrens culture products history media play culture and symbolic forms of expression The articles present general differences and divergences in methods and perspectives but also show what the two types of approach have in common
