Childhood In Crisis:

Childhood in crisis? The Open University, This 6 hour free course explored the concept of childhood and the ways in which the notion of crisis may shape how children in the West are seen **Childhood In Crisis?** Phil Scraton,2004-01-14 Examining debates concerning children and young people this text discusses the politics of childhood focusing on topics such as the family education and schooling mental health crime and justice and sexuality *Childhood in Crisis?* Phil Scraton,1996-06 Based on multi disciplinary academic research and professional practice Childhood in Crisis is conceived as a response to the current political and policy debates which maintain that childhood is in a state of crisis that there is a breakdown in discipline parental or professional guidance and that children and young people lack any sense of social responsibility On the one hand there is the reaffirmation of the family a commitment to harsher policies and tougher legislation on the other children and young people are systematically denied rights and are increasingly marginalized and alienated Providing the central historical and theoretical foundations of contemporary definitions of childhood the authors trace the background to and justifications of institutionalised responses They also examine in detail the expansive media coverage and popular discourses which collectively contextualise legal and policy responses identifying the James Bulger case as a watershed in UK media coverage *Who Cares for our Children?* Valerie Polakow,2007 Valerie Polakow spent a year traveling around the country listening to low income women from diverse backgrounds tell their stories of struggle resilience distress and occasional success as they encountered ongoing child care crises The resulting work is both a compelling account of the lived realities of the child care crisis and an incisive critique of public policy that points to the United States as an outlier in the international community Drawing on historical and international perspectives Polakow creates a groundbreaking analysis of child care as a human right persuasively arguing for a universal child care system *Who Cares for Our Children* is one of the most disturbing books I have read in a long time It should have a major impact on debates over poverty and social policy From the Foreword by Barbara Ehrenreich author of *Nickel and Dimed* In this beautifully written and provocative volume Polakow deftly steps aside and lets real mothers struggling against the odds to keep their families safe and sound speak for themselves about what they need This book delivers a timely message Child care should be viewed as a human right Martha F Davis Northeastern University School of Law A collection of moving and often chilling personal narratives *Who Cares for Our Children* is a powerful and well documented analysis of the worlds of low income families Beth Blue Swadener Arizona State University Thoroughly researched and grounded in a heartfelt sympathy for the struggles of families that face such painful choices and dilemmas in meeting the needs of their children James Garbarino Loyola University Chicago *Wired for Anxiety* Maren Smooth,2024-11-14 *Wired for Anxiety* Childhood in Crisis and the Rise of Mental Illness In today s hyper connected world our children are more plugged in pressured and alarmingly more anxious than any generation before *Wired for Anxiety* dives deep into the modern childhood crisis exploring the

unsettling reasons behind the rise in mental health issues among today's youth and the lasting impacts of an ever-wired world on young developing minds. From the moment children wake up to the instant they close their eyes at night, screens and social media are shaping their lives, often for the worse. Technology promises convenience and connection, yet studies are now revealing its darker side: overstimulation, cyberbullying, relentless social comparison, and a persistent feeling of FOMO (fear of missing out) that leaves kids feeling overwhelmed and stressed. This book brings together cutting-edge research, real-life stories, and expert insights to examine how technology, evolving societal expectations, and shifting parenting styles are altering childhood itself, creating an "always on" culture that impacts children's mental health, social skills, and overall happiness. *Wired for Anxiety* doesn't just diagnose the problems; it offers actionable solutions. Through this book, parents, educators, and policymakers will gain a comprehensive understanding of the mental health crisis affecting today's youth and find effective tools to counter it. From recognizing early signs of anxiety to creating healthy digital boundaries and fostering resilience, this book provides the knowledge and practical strategies needed to navigate the complexities of parenting and teaching in a digital world. In a time when childhood anxiety is reaching epidemic levels, *Wired for Anxiety* is an essential guide for anyone who cares about raising emotionally healthy, resilient children. With this insightful resource, you'll feel empowered to take back control and provide the support and guidance our children desperately need. Take the first step in understanding and protecting our children's future: buy your copy now and start making a difference. [Children in Crisis](#)

Manata Hashemi, Martín Sánchez-Jankowski, 2013-06-07. This volume brings together ethnographers conducting research on children living in crisis situations in both developing and developed regions, taking a cross-cultural approach that spans different cities in the global North and South to provide insight and analyses into the lifeworlds of their young at-risk inhabitants. Looking at the lived experiences of poverty, drastic inequality, displacement, ecological degradation, and war in countries including Haiti, Argentina, and Palestine, the book shows how children both respond to and are shaped by their circumstances. Going beyond conventional images of children subjected to starvation, hunger, and disease, to build an integrated analysis of what it means to be a child in crisis in the 21st century, the book makes a significant contribution to the nascent field of study concerned with development and childhood. With children now at the forefront of debates on human rights and poverty reduction, there is no better time for scholars, policymakers, and the general public to understand the complex social, economic, and political dynamics that characterize their present predicaments and future life chances.

Children of Crisis Robert Coles, 2003-07-30

In the 1950s Robert Coles began studying living among and above all listening to American children. The results of his efforts revealed in five volumes published between 1967 and 1977 constitute one of the most searching and vigorous social studies ever undertaken by one person in the United States. Here heard often in their own voices are America's children of crisis: African American children caught in the throes of the South's racial integration; The children of impoverished migrant workers in Appalachia; Children whose families were transformed by the migration from South to North from rural to urban communities; Latino, Native American, and Eskimo children in the poorest communities of the American West; The children of America's wealthiest families confronting the burden of their own privilege. This volume restores to print a masterwork of psychological and sociological inquiry, a book that in its focus on how children learn and develop in the face of rapid change and social upheaval speaks directly and pointedly to our own times. Robert Coles is a professor of psychiatry and medical humanities at the Harvard Medical School, a research psychiatrist for the Harvard University Health Services, and the James Agee Professor of Social Ethics at Harvard College.
