Children And Anthropological Research:

Children and Anthropological Research Barbara Butler, Diane Michalski Turner, 2013-11-11 The first time that we the editors of this volume met a chance remark by one of us newly returned from fieldwork in Fiji quickly led to an animated discussion of our experiences doing anthropological research with children Following that occasion we began to seek each other out in order to continue such conversations because we had found no other opportunity to discuss these significant events We knew our experiences were rich sources of cross cultural data and stimuli to rethinking anthropological theory and methods A cursory review of the literature on fieldwork revealed to our surprise that fieldworker s experiences with children were rarely and only briefly mentioned Hostetler and Huntington 1970 are an early exception In order to learn more about research that included the ethnographers children we organized a conference on the topic at Michigan State University on May 1 1982 This volume includes papers from that conference as well as insights and ideas from the formal and informal discussions among the conference participants and audience This volume like the conference which preceded it is intended to be the effects of accompanying children on anthropological an exploration of field research and on the effects of fieldwork on the children themselves Additionally we see this book as part of an anthropological inquiry into research as a cultural process by which is meant the effects of the researchers cultural identity class gender age ethnicity and other characteristics on fieldwork

Lancy, John Bock, Suzanne Gaskins, 2010-01-15 The Anthropology of Learning in Childhood offers a large mural like portrait of childhood across time culture species and environment Even a casual reading of the literature on childhood will persuade one that learning is a very important topic that commands the attention of tens of thousands of scholars and practitioners Yet anthropological research on children has exerted relatively little influence on this community This book will change that The book demonstrates that anthropologists studying childhood can offer a description and theoretically sophisticated account of children s learning and its role in their development socialization and enculturation Further it demonstrates the particular contribution that children s learning makes to the construction of society and culture as well as the role that culture acquiring children play in human evolution Chapters have been contributed in archaeology primatology biological and cultural anthropology and cross cultural psychology
