The Little Black Book of Decision Making Michael Nicholas,2017-07-05 The secret to making the right call in an increasingly complex world The decisions we make every day frequently automatic and incredibly fast impact every area of our lives *The Little Black Book of Decision Making* delves into the cognition behind decision making guiding you through the different ways your mind approaches various scenarios You ll learn to notice that decision making is a matter of balance between your rational side and your intuition the trick is in honing your intuition to steer you down the right path Pure reasoning cannot provide all of the answers and relying solely on intuition could prove catastrophic in business There must be a balance between the two and the proportions may change with each situation This book helps you quickly pinpoint the right mix of logic and gut feeling and use it to find the best possible solution Balance logic and intuition in your decision making approach Avoid traps set by the mind s inherent bias Understand the cognitive process of decision making Sharpen your professional judgement in any situation Decision making is the primary difference between organisations that lead and those that struggle *The Little Black Book of Decision Making* helps you uncover errors in thinking before they become errors in judgement

Good Decision Bad Decision Anil K. Choudhary,2013-02 Decision making appears to be a simple activity but the process leading to a decision is quite complex Unique aspect of decision making is that it is always done in advance but people weigh it in hindsight Therefore predicting a decision to be right or wrong at the time of decision making is always as good a guess as is the decision itself What is required at this stage is to understand the factors that may be impacting the decision maker and then accept or reject the decision being taken then and there On the contrary people tend to judge a decision as good or bad after the outcome is known which in author s view is not fair to the decision maker Success of a decision is not in it being good or bad right or wrong but being accepted when it is taken and not after knowing the outcome Author believes that acceptance of a decision is of far greater significance than the decision itself as unless accepted a decision has no relevance People not only accept or reject decision made by others but also by self If you thought accepting other s decision is more difficult then think again you would be surprised that many times accepting own decision is far more difficult Actually when others make a decision we can debate it criticize it pass on judgment but in almost all cases we forget it after sometime However when we make a decision we consciously or unconsciously keep deliberating and judging it for a long time

Accepting or rejecting our own decision impacts our behaviour more than when we accept or reject decision made by others and this influences our future actions towards every new situation An important aspect in the process is segregating decision maker and decision acceptor The acceptor of the decision has to have faith in the decision maker and be aware of the factors that the decision maker has taken into consideration while arriving at the decision When others are taking decision this is much easier but when one takes decision where he is also a significantly impacted stakeholder of the decision this becomes really difficult In fact people tend to swing between the role of a decision maker and decision acceptor throughout the process As a decision maker you should only worry about coming out with the most appropriate decision to meet the expected outcome using your knowledge available information and other such factors As a decision acceptor you should be focused on knowing the decision maker and various factors that he has used to arrive at the decision If you are convinced with that you should accept the decision without really worrying about the outcome This book is an attempt to bring in awareness about some key factors that influences decision making so that the stakeholders become better acceptors of a decision while it is being taken irrespective of the outcome Let us always remember Decision is just a decision at the time it is made it is neither good nor bad

Decisions Pankaj Garg,2020-01-02 We make decisions but decisions make our life All of us need to make decisions that may be major or minor One good decision can work wonders and dramatically change our lives forever Similarly one bad decision can prove disastrous and make life horrible So ultimately our life is a sum total of the decisions we make This highlights the fact that decision making is the most important thing we do throughout our lives If the decision making process is so vital then shouldn t an all out effort be made to improve this process Surprisingly and unfortunately most of us never try to do so There must be ways and methods to improve the process of decision making There must be a way to standardize the process of decision making so that the chances of error are minimized Can we learn this art and teach it to our children There is very little literature available on this topic
