**Good Government? Good Citizens?**  
W.A. Bogart, 2007-10-01 Good Government Good Citizens explores the evolving concept of the citizen in Canada at the beginning of this century Three forces are at work in reconstituting the citizen in this society courts politics and markets Many see these forces as intersecting and colliding in ways that are fundamentally reshaping the relationship of individuals to the state and to each other How has Canadian society actually been transformed Is the state truly in retreat Do individuals in fact have a fundamentally altered sense of their relationship to government and to each other Have courts and markets supplanted representative politics regarding the expression of basic values Must judicialized protection of human rights and minority interests necessarily mean a diminished concern for the common good on the part of representative politics To what extent should markets and representative politics maintain a role in the protection of human rights and minority interests Will representative politics ever hold the public trust again Good Government Good Citizens responds to these questions It does so by examining the altered roles of courts politics and markets over the last two decades It then examines a number of areas to gauge the extent of the evidence regarding transformations that have occurred because of these changing roles There are chapters on the First Peoples cyberspace education and on an ageing Canada The book concludes with reflections on the good citizen at the dawning of the new century Of particular interest to professors and students of law and political science Good Government Good Citizens will appeal to anyone interested in the changing face of Canada and its citizens

**The Money Machine** Daniel Stoffman,2000 Daniel Stoffman became intrigued by the mutual fund industry while writing the phenomenal bestseller Boom Bust Echo with David K Foot The stock markets

driven by baby boomers saving for their retirement were enjoying an extended bull run Mutual funds which few people had even heard of in the sixties were becoming the investment vehicle of choice Stoffman s first surprise was that the fund companies see themselves not as financial institutions but as manufacturers of products These products are marketed to consumers just like soft drinks or automobiles or razor blades The most successful companies aren t those that provide the best returns on clients investments they re the ones that most effectively market their products The industry has done a fine job of keeping investors ignorant of its workings Stoffman discovered and with good reason Most are unaware of the fees they pay to own mutual funds Few realize that financial planners are remunerated by the fund companies into which they put their clients money which means their advice may not be objective And not many understand that mutual fund companies can thrive even when they deliver mediocre performance As baby boomers retire and find them selves with the time to manage their own investments they re becoming more knowledgeable more discerning and more reluctant to pay the sometimes exorbitant fees charged by the fund companies All of this points to increasing consolidation among the mutual fund companies Stoffman believes and growing public pressure to reform the industry The Publishers Weekly ,2000
