Jungkuz,2016-03-31 Examines how the animal human divide has influenced power dynamics The division of life into animal and human is one of the fundamental schisms found within political societies Ironically given the immense influence of the animal human divide especially upon power dynamics the discipline in charge of theorizing and studying power political science and theory has had little to say about the animal human This book seeks to amend this vast oversight Acknowledging the complexity of the changing differences between animals and humans the contributors explore such topics as Marx Freud the animal and civilization dog breeding racism and democracy the meaningful silences of animals how sovereignty reconfigures the animal human and the paradoxical struggles against being dehumanized among immigrant workers in a slaughterhouse Political Theory and the Animal Human Relationship is necessary reading for anyone who wants to understand how power has been influenced by the animal human divide and what we can do about it *Interspecies Politics* Rafi Youatt,2020-02-25 This book explores the ways that international politics is a form of interspecies politics one that involves the interactions ideas and

practices of multiple species both human and nonhuman to generate differences and create commonalities While we frequently think of having an international politics of the environment a deep and thoroughgoing anthropocentrism guides our idea of what political life can be which prevents us from thinking about a politics with the environment This anthropocentric assumption about politics drives both ecological degradation and deep forms of interhuman injustice and hierarchy Interspecies Politics challenges that assumption arguing that a truly ecological account of interstate life requires us to think about politics as an activity that crosses species lines It therefore explores a postanthropocentric account of international politics focusing on a series of cases and interspecies practices in the American borderlands ranging from the US Mexico border in southern Texas to Guant namo Bay in Cuba to Isle Royale near the US Canadian border The book draws on international relations environmental political theory anthropology and animal studies to show how key international dimensions of states sovereignty territory security rights are better understood as forms of interspecies assemblage that both generate new forms of multispecies inclusion and structure forms of violence and hierarchy against human and nonhuman alike
