## **Borders Images:**

**Border images, border narratives** Johan Schimanski, Jopi Nyman, 2021-02-02 This interdisciplinary volume explores the role of images and narratives in different borderscapes. Written by experienced scholars in the field, *Border images border narratives* provides fresh insight into how borders, borderscapes, and migration are imagined and narrated in public and private spheres. Offering new ways to approach the political aesthetics of the border and its ambiguities, this volume makes a valuable contribution to the methodological renewal of border studies and presents ways of discussing cultural representations of borders and related processes. Influenced by the thinking of philosopher Jacques Rancière, this timely volume argues that narrated and mediated images of borders and borderscapes are central to the political process as they contribute to the public negotiation of borders and address issues such as the invisibility of migrants and the formation of alternative borderscapes. The contributions analyse narratives and images in literary texts, political and popular imagery, surveillance data, border art, and documentaries, as well as problems related to borderland identities, migration, and trauma. The case studies provide a highly comparative range of geographical contexts, ranging from Northern Europe and Britain via the Mediterranean and Mexican USA borderlands to Chinese borderlands, from the perspectives of critical theory, literary studies, social anthropology, media studies, and political geography.

**Visual Border Politics** Laura Holderied, 2026-05-15 The book highlights how images shape Europe's migration policies, using the pivotal 2015 refugee crisis as a lens to examine the complex intersection of visual media and border governance. Understanding visual border politics as situated practices of meaning-making that operate against the background of a structured visual order, it presents a critical framework that combines analyses of policy discourse and visual media discourse. Drawing on a broad sample of policy documents, a large visual dataset, and media analysis, the book adds complexity to existing analyses of visual politics in the context of migration. It shows that visual border politics do not operate in straightforward ways but are instead contextually bound. Whether images can be mobilized to legitimate policies depends on a number of factors, such as current and previous policies, the discursive climate, domestic developments, collective visual memories, and constitutions of collective identities. Drawing on insights from Critical Migration and Border Studies, Critical Security Studies, Visual International Relations, Visual Culture Studies, and Memory Studies, this volume will be of interest for multiple disciplines, including International Relations, Politics, Sociology, Anthropology, European Studies, Cultural Studies, Media and Communication Studies, History, Geography, and International Law.

**Updates in Diagnostic Pathology** David C. Chhieng, Gene P. Siegal, 2007-05-31 By CDs but we continue to utilize the same general format of morning didactics and afternoon glass slide review and small group interactions. One of our biggest successes was in the ever-expanding set of didactic lecture notes and radiologic gross microscopic ultrastructural and other images that course participants received, so it wasn't much of a surprise when we were approached by the publisher to consider creating an updated compilation of some of the best talks and packaging them in a monograph.

available to a broader population of physicians and scientists With the extraordinary attention to detail that he is known for my co editor David Chhieng has been both the brains and the brawn of this project resulting in the bringing together of such a collection while trying to be sensitive and representative of the various branches of pathology reflected in the actual course From surgical pathology chapters cover select topics in endocrine gynecologic GU and GI pathology with contributions from Walter Bell Michael Conner Katrin Klemm and Audrey Lazenby respectively Tom Winokur has begun to prepare us for the near future with a treatise on molecular markers in breast cancer The interactive nature of cytopathology and surgical pathology are brought together by Claudia Castro now at the U T Medical Branch at Galveston and David Chhieng in three chapters covering mediastinal pleural and pulmonary pathology
