## **Born Unwanted:**

*Born Unwanted* Henry Philip David, 1988      **Born to Grieve** C. K. Vetsch, 2017-08-25 It's difficult to comprehend that babies are brought into this world with the predestination to grieve. It seems unbelievable that an unborn child or a newborn baby could be set up to grieve and carry that burden throughout a lifetime. In *Born to Grieve*, author C. K. Vetsch explains how this can happen, shares these people's stories, and offers hope for their situation. Using her personal experiences as an unwanted child as a background, Vetsch explores the emotional abuse of unwanted children, the loss of a child, adoption, and abortion among others, and discusses the consequences and the impacts. In each chapter, she presents general examples and offers a personal or specific anecdote to illustrate the effects and how one may heal from them. In *Born to Grieve*, Vetsch helps those affected to look at their lives from a viewpoint of strengths rather than weaknesses. She communicates how it's time to put down the burden and find wholeness in body, mind, and spirit.      *Born Unwanted* Steven C. King, 2004-04-22

**Children in Jeopardy** Irving Brooks Harris, 1996-01-01 Harris, a successful businessman, has devoted himself to children's causes for the past forty years and has initiated and funded numerous programs geared to children and families. He presents data from research in pediatrics, social work, nursing, psychology, and education, showing that children who receive early nurturing and stimulation are far more likely to have success in school and in life.      Psychiatric Advanced Practice Nursing Eris F. Perese, 2012-01-05 Here's an evidence-based, holistic approach to caring for psychiatric and mental health patients in outpatient settings. Using a biopsychosocial model, this text addresses mental health issues through stabilization of brain chemistry, individualized psychotherapy, and re-socialization into the community. Inside, you'll find an in-depth focus on specific psychiatric disorders, including the epidemiology, etiology, biological basis, clinical presentation of adults, older adults, and children, comorbidities, differential diagnosis, and treatment. There is also comprehensive coverage of the interventions and Levers of Change used to aid patients in their recovery, as well as preventative interventions.      *Forgetting Children Born of War* Charli Carpenter, 2010-06-03 Excellent, well-documented, thoughtful, and comprehensive. *Forgetting Children Born of War* challenges the prevailing discourse on human rights and humanitarian intervention. ALISON BRYSK, University of California, Irvine.      *Today's Priorities in Mental Health* S.H. Fine, R. Knell, T.Y. Lin, 2012-12-06 Two themes seem to emerge repeatedly when reading through this volume: One is consensus, and the other is search. There was a strong consensus during the Congress that children and families were the major and foremost concern of all present, regardless of their geographic origin or professional background. This concern was often expressed in terms of commitment to or as a goal for the international mental health movement for the years to come. The second theme, search, represents an effort to translate this concern into activities, search for concrete, immediate goals, for ways and means of translating into actual programs and projects for interested people to carry on the work, and better ways to train them to do the work well, for ways to obtain support, and lastly, search for ways of coordinating efforts of people in different parts of the world. All these and other matters

are taken up in the discussions in this volume The complexity of problems encountered in a rapidly changing world and the diversity of resources available in different parts of the world make the task of searching difficult and sometimes confusing In spite of the earnest efforts made the results may be inconclusive and some of those proposed can be regarded only as hypotheses or ideas for experimentation

**Biology and Economics** Hsiang-Ke Chao, Szu-Ting Chen, Roberta L. Millstein, 2013-07-31 This volume addresses fundamental issues in the philosophy of science in the context of two most intriguing fields biology and economics Written by authorities and experts in the philosophy of biology and economics Mechanism and Causality in Biology and Economics provides a structured study of the concepts of mechanism and causality in these disciplines and draws careful juxtapositions between philosophical apparatus and scientific practice By exploring the issues that are most salient to the contemporary philosophies of biology and economics and by presenting comparative analyses the book serves as a platform not only for gaining mutual understanding between scientists and philosophers of the life sciences and those of the social sciences but also for sharing interdisciplinary research that combines both philosophical concepts in both fields The book begins by defining the concepts of mechanism and causality in biology and economics respectively The second and third parts investigate philosophical perspectives of various causal and mechanistic issues in scientific practice in the two fields These two sections include chapters on causal issues in the theory of evolution experiments and scientific discovery representation of causal relations and mechanism by models in economics The concluding section presents interdisciplinary studies of various topics concerning extrapolation of life sciences and social sciences including chapters on the philosophical investigation of conjoining biological and economic analyses with respectively demography medicine and sociology
