The Cahokia Atlas Melvin Leo Fowler, 1997 **Language and Cognition** Lawrence J. Raphael, 1984-01-01 We are pleased to be able to honor Arthur J Bronstein with this volume of essays We are all the more pleased because the volume has consider able intrinsic merit but neither the reader nor Arthur should have any doubts about our primary purpose in assembling this book That the col lection is intrinsically valuable is in itself a tribute to the man whom it honors The contributing authors are all colleagues students and friends of Arthur Readers who are acquainted with Arthur will not be surprised by the broad range of academic expertise which has been brought to bear on the subject of language in this book They will recognize that Arthur s own range of expertise and interest is only barely matched by the contents of the essays and the backgrounds of their authors On the other hand those who know little about Arthur may have thought of him primarily in narrow association with phonetics and lin guistics most likely as the author of *The Pronunciation of American English* surely the most influential of American phonetics texts during the last quarter of a century Although such an association is in many respects appropriate it is altogether too limited but this will not deter us from using it as the basis for a relevant and we hope revealing metaphor about Arthur J *Geological Survey of Canada, Open File 2508* ,
