

A serene sunset scene over a calm body of water. The sun is low on the horizon, creating a bright, shimmering reflection that stretches down the center of the water. A small boat is visible in the middle ground, slightly to the right of the reflection. The sky is a mix of soft orange and pink hues. The overall mood is peaceful and contemplative.

Borrowed Tides:

Borrowed Tides Paul Levinson, Professor of Communication and Media Studies Paul Levinson, 2016-10-09 Aaron Schoenfeld has parlayed a Ph D in the philosophy of science and a sharp tongue into an improbable second career as director of a project to plan and execute the first interstellar voyage The trip to Alpha Centauri will take many years and might end up being a one way journey for the crew His old acquaintance Jack Lumet may be the unlikely source of an answer An anthropologist obsessed with the myths of Native Americans he once wrote a paper about Wise Oak an Iroquois sachem who claimed to have ridden a cosmic version of the Hudson a tidal river that flows both ways to the stars and back In a world where money for space journeys is hard to come by even a slightly mad theory that suggests a possible shortcut to the stars is an attractive possibility for the people who believe more in humanity s destiny among the stars than they do in safety considerations minimal risks or taking no for an answer *Childhood, Science Fiction, and Pedagogy* David W.

Kupferman, Andrew Gibbons, 2019-04-24 This book invites readers to both reassess and reconceptualize definitions of childhood and pedagogy by imagining the possibilities past present and future provided by the aesthetic turn to science fiction It explores constructions of children childhood and pedagogy through the multiple lenses of science fiction as a method of inquiry and discusses what counts as science fiction and why science fiction counts The book examines the notion of relationships in a variety of genres and stories probes affect in the convergence of childhood and science fiction and focuses on questions of pedagogy and the ways that science fiction can reflect the status quo of schooling theory practice and policy as well as offer alternative educative possibilities Additionally the volume explores connections between children and childhood studies pedagogy and posthumanism The various contributors use science fiction as the frame of reference through which conceptual links between inquiry and narrative grounded in theories of media studies can be developed
