Botticellis Face:

Little Journeys to the Homes of Eminent Artists: Raphael ; Leonardo ; Botticelli ; Thorwaldsen ; Gainsborough ; Velasquez Elbert Hubbard,1902 Botticelli Emile Gebhart,Victoria Charles,2012-05-08 He was the son of a citizen in comfortable circumstances and had been in Vasari s words instructed in all such things as children are usually taught before they choose a calling However he refused to give his attention to reading writing and accounts continues Vasari so that his father despairing of his ever becoming a scholar apprenticed him to the goldsmith Botticello whence came the name by which the world remembers him However Sandro a stubborn featured youth with large quietly searching eyes and a shock of yellow hair he has left a portrait of himself on the right hand side of his picture of the Adoration of the Magi would also become a painter and to that end was placed with the Carmelite monk Fra Filippo Lippi But he was a realist as the artists of his day had become satisfied with the joy and skill of painting and with the study of the beauty and character of the human subject instead of religious themes Botticelli made rapid progress loved his master and later on extended his love to his master s son Filippino Lippi and taught him to paint but the master s realism scarcely touched Lippi for Botticelli was a dreamer and a poet Botticelli is a painter not of facts but of ideas and his pictures are not so much a representation of certain objects as a pattern of forms Nor is his colouring rich and lifelike it is subordinated to form and often rather a tinting than actual colour In fact he was interested in the abstract possibilities of his art rather than in the concrete For example his compositions as has just been said are a pattern of forms his figures do not actually occupy well defined places in a well defined area of space they do not attract us by their suggestion of bulk but as shapes of form suggesting rather a flat pattern of decoration Accordingly the lines which enclose the figures are chosen with the primary intention of being decorative It has been said that Botticelli though one of the worst anatomists was one of the greatest draughtsmen of the Renaissance As an example of false anatomy we may notice the impossible way in which the Madonna s head is attached to the neck and other instances of faulty articulation and incorrect form of limbs may be found in Botticelli s pictures Yet he is recognised as one of the greatest draughtsmen he gave to line not only intrinsic beauty but also significance In mathematical language he resolved the movement of the figure into its factors its simplest forms of expression and then combined these various forms into a pattern which by its rhythmical and harmonious lines produces an effect upon our imagination corresponding to the sentiments of grave and tender poetry that filled the artist himself This power of making every line count in both significance and beauty distinguishes the great master draughtsmen from the vast majority of artists who used line mainly as a necessary means of representing concrete objects **Little Journeys to the Homes of the Great** Elbert Hubrard,2020-07-28
