Francisco Javier Muñiz

Chicos Científicos:

Desarrollo de los conceptos básicos matemáticos y científicos en los niños Kenneth Lovell, 1986 Esta obra de LOVELL representa una combinación ideal de teoría y práctica en la que se trata el problema de la formación general del concepto lógico y la intuición desde el punto de vista de los fundamentos matemáticos el camino para ayudar al niño en la comprensión del número y de las operaciones numéricas evaluándose diversos procedimientos a la luz de los trabajos de PIAGET el desarrollo de los conceptos de sustancia peso tiempo velocidad espacio y las medidas de longitud superficie y volumen Constituye un libro pedagógico claro no dogmático y lleno de buen sentido cuyo estudio será útil tanto a los profesores en ejercicio como a los que realizan su formación docente Su eficacia queda sobradamente demostrada por las diez ediciones de que ha sido objeto en su versión original

Instrucciones para contagiar la ciencia Juan Nepote, Diego Golombek, Jorge Wagensberg, Claudia Aguirre, Melina Furman, Milena Winograd, Roberto Sayavedra, Marcelo Knobel, Sandra E. Muriello, Carlos E. Díaz, Valeria Román, Nora Bär, Tomás Granados Salinas, Carla Baredes, Ileana Lotersztain, Patricia Magaña Rueda, Eduardo Saenz de Cabezón, Facundo Álvarez Heduan, Pablo Adrián González, Juan Manuel Garrido, Gabriel Cruz, Alberto Rojo, Pablo Amster, José Gordon, Gabriela Vizental, Claudio Martínez, Ernesto Blanco, Gerry Garbulsky, Julia Tagüeña, Lino Barañao, Luisa Massarani, Ildeu Moreira, Vladimir de Semir, 2020-10-12 Y como con el bostezo la risa el frío o la juventud aquí estamos proponiendo contagiar la gran aventura humana la ciencia En lugar de abrir la boca bostezando contagiar el reflejo por el que se nos caen la mandíbula frente a un descubrimiento compartir la risa de un experimento el escalofrío de saber que por un momento hay un secreto de la naturaleza que sólo conocemos nosotros y la naturaleza claro la juventud que implica estar siempre a la caza de preguntas Más allá de la ciencia profesional aquí nos centramos en contagiar el pensamiento científico aquella porción de la cultura que nos despierta curiosidades inquietudes cosquillas Las herramientas de este contagio sus virus y bacterias son el objeto de este libro Así algunos de los más importantes contagiadores de Iberoamérica nos comparten sus secretos sus peticiones y sus instrucciones confidenciales a la hora de esparcir brotes de ciencia Todos los escenarios son límites y por esta razón circulan museos libros diarios aulas revistas televisores artes radios y carnavales No importan de dónde vengan los agentes infecciosos tendremos científicos periodistas divulgadores editores y hasta un ministro que nos dejarán entrar a la trastienda de sus misterios y nos compartirán sus misterios a la hora de inocular la ciencia con la honestidad de comunicar eventos triunfantes y de los otros Si somos exitosos y confiamos en serlo estas pginas tendrán a su vez un efecto multiplicativo y sus lectores de manera inexplicable e inmediata se convertirán a su vez en contagiadores en parte de una epidemia zombie que en lugar de comer cerebros los celebre los ilumine y predique esta manera tan particular de ver el mundo con ojos de científico No nos unen el amor ni el espanto sino el contagio de la ciencia

comunicación. Laura Álvaro Andaluz, 2021-07-02 A lo largo de este libro vamos a encontrar experiencias de éxito e investigaciones que analizan desde diversas perspectivas las posibilidades transformadoras de la educación para la igualdad. Son numerosas las iniciativas y los análisis que aquí se incluyen tratando de abordar la coeducación de una manera holística y abarcando todos los agentes de socialización. Primeramente se presenta un bloque en el que se recogen experiencias e investigaciones referentes a la educación infantil y primaria. Durante esta etapa educativa estamos creando los cimientos de la personalidad de cada niño y niña. Es por ello por lo que aquellos valores que se transmitan a lo largo de los primeros años de escolaridad serán la base para aprendizajes posteriores. Poner el foco aquí será clave para un futuro más justo y equitativo. Después en un segundo y tercer bloque se han agrupado las experiencias propias de la educación secundaria y la educación terciaria y universitaria. Damos cabida a todos los niveles educativos ya que cada uno de ellos jugará un rol definitivo para la construcción de un pensamiento crítico en el alumnado. A continuación en el cuarto bloque encontramos propuestas referentes a la educación no formal ya que la socialización se plantea más allá de los entornos de la escolarización reglada. De hecho por ser la educación no formal un contexto más relajado en el que el interés del alumnado está más agudizado es fundamental prestar atención a lo que se cuenta y cómo se cuenta ya que será fácilmente absorbido y naturalizado por los y las aprendices. Seguimos con un bloque dedicado a la educación para la igualdad en las familias. Este es un eje poco habitual en los contextos académicos pero que hemos considerado primordial incluirlo en este libro ya que esta la familia es el primer agente de socialización y por tanto los conocimientos y los valores que se transmitan en ella serán los primeros con los que niños y niñas empiecen a construir su personalidad. Para finalizar incorporamos en el último bloque el eje referente a los medios de comunicación y cómo pueden colaborar en la educación para la igualdad o por el contrario contribuir en la perpetuación de las desigualdades. Como último agente de socialización los medios contribuyen a la creación del imaginario colectivo de la ciudadanía y por ello marcan tendencias, valores, pautas, costumbres y normas. Analizar su influencia y resaltar las propuestas que aboguen por la equidad es favorecer una actuación conjunta en pro de dicha igualdad. Con este libro pretendemos aportar una visión en la que una sociedad justa es no solo viable sino la mejor opción para todos y todas. Porque solo trabajando de manera colectiva se logra el verdadero y necesario cambio. Una transformación que pone en valor el poder de la educación y la socialización y que deja patente que solo desde la base podremos prevenir la violencia en todas sus formas conformando personas justas, respetuosas, dialogantes y tolerantes para las que no exista otra opción que la igualdad entre todos los seres humanos.
