Child Centred Education

Michele Schweisfurth

Child Centred Education:

Child-Centred Education Harold Entwistle, 2012 This volume is a critical study of one of today's most controversial topics in educational theory setting the many arguments in perspective and clarifying the issues that arise when attention is focused on the learner The author examines the problems of individual education the distinctive demands childhood makes on the school and the claims of social education The related questions of freedom authority and discipline are then discussed together with the ways in which curriculum development must take account of the learner's interests needs and dispositions in preparing him/her for life The concept of educating the whole person is critically examined together with the claim that education for life and the development of personal integrity require an integrated curriculum Since child centred educational theory is often dismissed as irrelevant to practice the book concludes with an assessment of the various limitations which concern with practical activity imposes on educational theorists

Child Centred Education Sue Rogers, 2014-04-26 What is child centred education Where do its core ideas stem from What do these ideas mean for children and teachers today Child centred education is central to contemporary debates about what constitutes effective teaching and learning Frequently pitched against formal approaches to education it is often understood to mean a laissez faire approach to teaching and learning with little substance and little intervention on the part of adults Others argue that child centred education has been superseded by a subject driven and target led approach one in which the child's interests and ideas have been marginalised and where teachers have become mere technicians trained to deliver a highly prescriptive curriculum content Child Centred Education aims to unravel the complexities and nuances surrounding these polarised positions Through an analysis of groundbreaking research policy initiatives and illustrated with concrete examples of practice it presents an accessible introduction to child centred education Key issues explored include how far a child centred approach is realistic in the modern classroom the role of play in learning and children's lives more widely the impact of new technologies and social networking creativity and personalisation child centred approaches for the highly diverse classroom international research into alternative pedagogies for the primary school the relationship between the child school and politics Offering a detailed engaging exploration of both historical and contemporary perspectives Child Centred Education is for all student and practising primary teachers education studies students and all those undertaking related master levels courses

Child-Centred Education Christine Doddington, Mary Hilton, 2007-09-27 Against an increasingly authoritarian background of testing and instruction concern is growing about disengagement and loss of depth and quality in education at all levels Child Centred Education seeks to explore the role of Primary education within this debate The book will inspire teachers and head teachers seeking to make their practice more genuinely educational The authors capture the current opinion that primary schools can begin to reclaim some of their autonomy be innovative and become more creative Based on wide ranging research the book sets out to revive the creative alternative to the rigid and impoverished learning experienced

by too many primary school children The authors Trace the origins and history of the child centred tradition Set out its fundamental beliefs and values Explore its place in education today This book is for teachers school governors local authority officers undergraduate and postgraduate teacher training and professional development courses

Learner-centred Education in International Perspective Michele Schweisfurth,2013 Is learner centred education appropriate for all societies and classrooms Learner centred education LCE is a travelling policy widely promoted by international agencies and national governments Arguments in favour of this pedagogical tradition refer to theories and evidence from cognitive psychology claiming that all learners can benefit equally from its judicious use Beyond the benefits to the individual however lie a set of assumptions about learner centred education as a foundation for the building of democratic citizens and societies suitable for economies of the future These promises have been questioned by critics who doubt that it is appropriate in all cultural and resource contexts and there is considerable evidence in the global South of perennial problems of implementation In the light of these debates is LCE still a good development bet This book provides an authoritative and balanced investigation of these issues exploring the contextual factors from global movements to local resourcing realities which have fuelled it as a discourse and affected its practice In the light of the theoretical underpinnings and research evidence the book addresses pressing questions to what extent is learner centred education a sound choice for policy and practice in developing countries And if it is a sound choice under which conditions is it a viable one The book is divided into three key parts Learner centred Education as a Global Phenomenon Learner centred Education in Lower and Middle income Countries Lessons and Resolutions This book provides a much needed fresh analysis of the concept and practice of LCE It will be valuable reading for academics and post graduates with a focus on comparative and international education along with policy makers in developing countries and development agencies

Child-Centred Education John Darling,1994 I recommend John Darling s book to everyone interested in education today Times Educational Supplement Scotland It represents an important contribution to the study of curriculum at a time when that study is being seriously eroded and is especially to be welcomed because that contribution seeks to keep alive the progressive alternative Early Years The book has much to offer It is written with clarity and style and in a language that is immediately accessible Education Today and Tomorrow Child Centred Education is undoubtedly a well researched and equally well written book in addition to affording a rich source of re

Is a Child-centred Education Based on Developmental Principles the Basis for Early Years Provision and If So Does it Ensure an Equitable Education for All Children? Luciana Talpo,2011 *Child-centred Education* John Darling,1994 *World-Centred Education* Gert Biesta,2021-07-12 This book makes an intervention in a long standing discussion by arguing that education should be world centred rather than child centred or curriculum centred This is not just because education should provide students with the knowledge and skills to act effectively in the world but is first and foremost because the world is the place where our existence as human beings takes place In the seven chapters in this book

Gert Biesta explores in detail what an existential orientation to education entails and why this should be an urgent concern for education today. He highlights the importance of teaching not understood as the transmission of knowledge and skills but as an act of re-directing the attention of students to the world so that they may encounter what the world is asking from them. The book thus shows why teaching matters for education. It also highlights the unique position of the school as the place where the new generation is given the time to meet the world and meet themselves in relation to the world. The extent to which society is still willing to make this time available is an important indicator of its democratic quality. This important text demonstrates not only to academics but also to students, teachers, school administrators and teacher educators the urgency of a world-centred orientation for education today.

Pedagogies for Development Arathi Sriprakash, 2012-01-24. *Pedagogies for Development* takes a sociological approach to examine the introduction of child-centred education in contemporary Indian policy and school contexts. It investigates the promise of democratic learning in development discourses to ask how far child-centred models can address poverty and social inequalities in rural Indian communities. Drawing on in-depth ethnographic research conducted in the south Indian state of Karnataka, the book offers a multi-level analysis of international, national and state education practices of pedagogic reform. The book contributes to pressing debates about how quality education should be conceptualised and assessed in development contexts and brings into focus the assumptions which associate schooling to social justice.

Complexities of Teaching Ciaran Sugrue, 1997. First published in 2004. Routledge is an imprint of Taylor Francis, an Informa company. **Teaching Kindergarten** Julie Diamond, Betsy Grob, Fretta Reitzes, 2015-09-30. Today's kindergarten teachers face enormous challenges to reach district-mandated academic standards. This book presents a model for 21st-century kindergartens that is rooted in child-centered learning and also shaped by the needs and goals of the present day. Classroom teachers working with diverse populations of students and focusing on issues of social justice provide vivid descriptions of classroom life across urban and rural communities. Teacher reflections and commentary from the editors link teacher decisions to principles of good practice. *Teaching Kindergarten* illustrates how a progressive learning-centered approach can not only meet the equity and accountability goals of the Common Core State Standards but go well beyond that to educate the whole child.

Creating Child-centered Programs for Infants and Toddlers Eleanor Stokes Szanton, 1997. In child-centered education programs, children construct their own knowledge from their experiences and interactions with the world around them, and caregivers foster children's growth and development by building on children's interests, needs, and strengths within a safe and caring environment. The Step by Step educational program developed a series of child-centered teaching manuals for caregivers and teachers in early childhood programs in Central and Eastern Europe. The series was initially intended for preschool but has been extended to include children from birth to age 10. This manual offers caregivers birth to age 3 practical advice on how to 1) support infants and toddlers' emotional, social, cognitive, language, and physical development; 2)

recognize and respond to each child's temperament and interests 3 create an environment that is safe healthy and stimulating and 4 work with families and other professionals to ensure a quality program The manual's contents are 1 Part 1 Introduction includes program rationale and philosophy 2 Part 2 The Research Base for the Methodology includes infant and toddler development 3 Part 3 How Infants and Toddlers Learn includes supporting emotional development guiding social development guiding cognitive development guiding early language development guiding physical development using daily routines as learning experiences observing recording and reporting on children's development and families and caregivers together supporting infants and toddlers 4 Part 4 The Environment for Learning includes ensuring a healthy environment ensuring a safe environment promoting good nutrition and physical space designing responsive environments for infants and toddlers and 5 Part 5 Program Staffing and Evaluation Contains approximately 120 references EV Post-apartheid Teacher Education Reform in Namibia Lars Dahlström, 2002 This thesis is about teacher education reform It is a narrative of attempted change in the area of teacher education in post apartheid Namibia **The Forum of Education**, 1923 **Education Reform and Innovation in Namibia** Teresa Sguazzin, Mariana van Graan, 1999 *The School*, 1930 **Journal of Education**, 1929 **Education for the New Era**, 1928
