Child In Question:

The Child in Question Diana Gittins, 1998 Diana Gittins draws on a range of sources psychoanalytic historical social literary artistic and personal to unpack our common assumptions about the child and childhood and explore the meanings and values that are commonly attributed to them It is in the blurring and overlapping of adults multiple and diverse notions of what the child is and should be where confusions and contradictions arise Gittins suggests then that the problem lies in what the child means and has meant to adults and in how adults succeed in assimilating and organizing these conflicting meanings into behaviors and policies that will affect the life chances of real children further down the line *Children's Language* Gina Conti-Ramsden, Catherine E. Snow, 2014-02-04 This volume presents current research findings on vital issues in language development compiled by an international group of leading researchers The data are drawn from studies of the acquisition of Swedish Polish Serbo Croatian Hungarian Portuguese Italian and English Themes emphasized in all the chapters include the importance of the social context of acquisition the existence of interconnections among various domains of language development and the impossibility of understanding acquisition using a simple theory or a single methodological approach [Oxford Textbook of Palliative Care for Children](#) Ann Goldman, Richard Hain, Stephen Liben, 2012-05-24 The first edition of this book was the first authoritative systematic and comprehensive text to define the increasingly important and evolving specialty of paediatric palliative care It explores both the clinical aspects and the multidimensional and holistic nature of care for the dying child based on the knowledge that all human experience has a physical emotional psychological and spiritual impact The book covers ways of providing support in all of these areas both for the child families and carers recognising the importance of teamwork and taking an evidence based approach The Oxford Textbook of Palliative Care for Children is about the care of children for whom cure of their underlying disease is not possible It encompasses the physical management of symptoms such as pain and nausea as well as social issues such as accessing appropriate education emotional issues such as techniques for communication and spiritual issues such as feelings of guilt and isolation The book suggests that if we are to maintain the quality of life for a child it is essential to recognise all these dimensions and try to address them This can only be done by recognising the skills of a wide range of professionals and working together in ways that are not always intuitive to any one discipline It explores the multidimensional and holistic nature of care for the dying child Those working in paediatric palliative care recognise that all human experience has emotional psychological and spiritual impact as well as physical and this book offers the essential information needed for those involved in paediatric care to find ways of providing support in all of these areas Comprehensive in scope exhaustive in detail and definitive in authority this second edition has been thoroughly updated to cover new practices current epidemiological data and the evolving models that support the delivery of palliative medicine to children Paediatric palliative care is now developing in countries with differing health care systems and being adapted to suit individual illnesses and the varying resources and geography in
