13 Women Parables From Prison:

13 Women, 2006 **13 Women** Karlene Faith, 2024-06-29 This print on demand title is available by request from most booksellers A remarkable and compelling collection of true stories from women in prison told in their own words 13 Women conveys the personal accounts of women in prison spanning three decades and taking place in Canada the United States and Brazil Most of the women in these pages as is true for the majority of imprisoned women were incarcerated for offences related to drugs and theft Several were involved in violent incidents Three of the contributors Betty Krawczyk Ann Hansen and Christine Lamont did time for political activities that received international media attention Karlene Faith s work as a long time prisoners rights activist has given her deep insight into the politics of punishment The commentary and reflections she and co editor Anne Near contribute to the book raise provocative questions about personal accountability the state s uses and abuses of power and the broad social challenges women face **Women Prisoners and Health Justice** Dianne Hatton, Anastasia Fisher, 2018-04-19 Incarceration severely affects the health and wellbeing of women both during their incarceration and following release further complicating the health disparities they already experience as a consequence of gender race and social class The scope of this international problem remains largely hidden from health professionals and policy makers This book brings the issues into the light with contributions from leading advocates criminologists feminists nurses physicians public health professionals social workers sociologists and former prisoners Gender, Psychology, and Justice Corinne C. Datchi, Julie R. Ancis, 2017-04-18 Reveals how gender intersects with race class and sexual orientation in ways that impact the legal status and well being of women and girls in the justice system Women and girls contact with the justice system is often influenced by gender related assumptions and stereotypes The justice practices of the past 40 years have been largely based on conceptual principles and assumptions including personal theories about gender more than scientific evidence about what works to address the specific needs of women and girls in the justice system Because of this women and girls have limited access to equitable justice and are increasingly caught up in outdated and harmful practices including the net of the criminal justice system Gender Psychology and Justice uses psychological research to examine the experiences of women and girls involved in the justice system Their experiences from initial contact with justice and court officials demonstrate how gender intersects with race class and sexual orientation to impact legal status and well being The volume also explains the role psychology can play in shaping legal policy ranging from the areas of corrections to family court and drug court Gender Psychology and Justice provides a critical analysis of girls and women s experiences in the justice system It reveals the practical implications of training and interventions grounded in psychological research and suggests new principles for working with women and girls in legal settings *For the Children?* Erica R. Meiners, 2016-10-15 Childhood has never been available to all In her opening chapter of *For the Children* Erica R Meiners stakes the claim that childhood is a racial category often unavailable to communities of color According to Meiners this is

glaringly evident in the U S criminal justice system where the differentiation between child and adult often equates to access to stark disparities And what is constructed as child protection often does not benefit many young people or their communities Placing the child at the heart of the targeted criminalization debate For the Children considers how perceptions of innocence the safe child and the future operate in service of the prison industrial complex The United States has the largest prison population in the world with incarceration and policing being key economic tools to maintain white supremacist ideologies Meiners examines the school to prison pipeline and the broader prison industrial complex in the United States arguing that unpacking child protection is vital to reducing the nation s reliance on its criminal justice system as well as building authentic modes of public safety Rethinking the meanings and beliefs attached to the child represent a significant and intimate thread of the work to dismantle facets of the U S carceral state Taking an interdisciplinary approach and building from a scholarly and activist platform For the Children engages fresh questions in the struggle to build sustainable and flourishing worlds without prisons
