Coordination and Growth Simon Klaas Kuipers, 2001-09-30 Coordination and Growth Essays in Honour of Simon K Kuipers addresses a rich variety of coordination issues in macroeconomics It contains detailed studies in economic policy monetary economics and growth theory and uses various methodologies to address the coordination issue from a pure theoretical to an empirical econometric approach It is stressed that modern macroeconomics should focus on coordination issues Imperfections of various kinds are likely to lead to coordination failures which can lead to large welfare losses Macroeconomists should address the causes and implications of imperfections and failures In this book attempts are made to increase our knowledge in this field The book is a tribute to one of the leading Dutch macroeconomists Simon K Kuipers Simon Kuipers shows a major interest in the theory of capital following e.g Harrod growth theory following Solow monetary theory following Tobin and disequilibrium theory following Malinvaud and Benassy The lines of thought have in common that they use frictions to explain the functioning of a market economy The nature of the frictions varies from pure quantity rationing like in the Malinvaud analysis to imperfect substitution of various capital goods like in the vintage models or assets in the general monetary equilibrium models proposed by Tobin Kuipers is not only interested in pure theoretical contributions he also stimulates econometric work in line with the Dutch tradition initiated by Tinbergen His applied work relates to policy analysis and policy prescriptions in many fields ranging from monetary economics to distortions in the labour market Kuipers can be classified as a true Keynesian although he admires neoclassical theory for its rigour and compactness Better still he is an eclectic economist with an open eye for the different schools of thought in macroeconomics
