Languages of Reform in the Eighteenth Century Susan Richter, Thomas Maissen, Manuela Albertone, 2019-10-18 Societies perceive Reform or Reforms as substantial changes and significant breaks which must be well justified. The Enlightenment brought forth the idea that the future was uncertain and could be shaped by human beings. This gave the concept of reform a new character and new fields of application. Those who sought support for their plans and actions needed to reflect, develop new arguments, and offer new reasons to address an anonymous public. This book aims to compile these changes under the heuristic term of languages of reform. It analyzes the structures of communication regarding reforms in the 18th century through a wide variety of topics.

The European Nobility in the Eighteenth Century Jeremy Black, Jerzy Lukowski, 2003-07-16 The position of the nobility depended on a stable world which accepted their authority, but in the eighteenth century that world was becoming increasingly fractured as a result of social and economic developments and new ideas. Since nobles were in economic terms an extremely disparate group ranging from the near destitute to the unimaginably wealthy, how could this ruling class preserve a coherent identity? Was wealth more important than birth or education? How should wealth be retained or accumulated? And what role did women play in shoring up noble pre-eminence? In this wide-ranging study, Jerzy Lukowski addresses these issues and shows the pressures and tensions both from governments and from the lower orders which challenged traditional ruling groups in Europe during the century before the French Revolution. Lukowski explains the basic mechanisms of noble existence and examines how the European aristocracy sought to maintain a sense of solidarity in the midst of widespread change.

Enlightenment and Reform in Eighteenth-century Europe Derek Beales, 2005-03-24 The 18th century was a unique period of global and fundamental change. Britain conquered India and much of America; the American Revolution produced the USA and Russia expanded vastly. In the field of ideas, the Scientific Revolution was consolidated and followed by the Enlightenment. Nationalism flourished, populations surged, and the Commercial and Industrial Revolutions with Western technology eclipsed the East. Few centuries have inspired such a galaxy of historians, and their groundbreaking work has been drawn upon by Derek Beales in his collection of articles and special lectures. He covers the whole European kaleidoscope but focuses especially on Joseph II and the Hapsburg monarchy, asserting that Enlightened Despotism was the embodiment of the century's revolution in ideas, politics, government, and administration.
