1939 Sidney Aster,1973 **Nineteen Thirty-nine)1939 - the Making of the Second World War** Sidney Aster,1973

Power and Stability Erik Goldstein,B. J. C. McKercher,2003 This work assesses British policy in those 100 years when Britain s international position diminished from the only global power to a regional European state **The Second World War and North East India** Sima Saigal,2022-04-11 This book discusses the untold story of North East India s role during the Second World War and its resultant socio economic and political impact It goes beyond standard campaign histories and the epicentre of the Kohima Imphal battlefields to the Brahmaputra and Surma Valley of Assam the administrative and political hub of the region where decisions on the allied war efforts were deliberated and effected right from the outset of the War What happened in the entire region during the intervening years from 1939 What did the war mean for the people of Assam How were resources from the region mobilized for the global war effort and how did people adapt co opt and survive during these tumultuous years What was the response of the nationalist and provincial political leaders to the challenges and demands of war How did the crisis of the 1942 war impact the region First of its kind this book investigates hitherto unanswered questions to offer an understanding of contemporary Assam and the North East including discussions on the complexity of issues such as terrain migration taxation profiteering inflation famine and food grain trade With its lucid style and rich archival material this volume will be essential for scholars and researchers of history the Second World War South Asian history politics and international relations colonial studies sociology and social anthropology and North East India studies as well as to the interested general reader *Grandeur And Misery* Anthony Adamthwaite,2014-03-04 Recent studies have challenged the view of fundamental French weakness in 1940 and for the first time the revisionist approach is displayed in a single volume both summarizing the research of others and drawing on the author s own work in the archives

Blue-water Rationale Ian C. McGibbon,1981 For twenty years the strategic basis of New Zealand s defence policy was the main fleet to Singaport strategy the theory of a properly defended Singapore Naval Base to which adequate British naval forces would be despatched to defend the Empire east of Suez In the event a fleet far smaller than originally planned arrived at Singapore in December 1941 only to suffer immediate annihilation the Base held out not the months predicted by British experts but rather just seven days before falling to attacking Japanese forces on 15 February 1942 This book then is essentially a study of why New Zealand placed reliance on an unsatisfactory strategy which was always admitted to be second best to that in which a battlefleet was permanently based in the Pacific The evolution of post war arrangements for the protection of the British Empire in the Far East and Pacific Ocean is traced with emphasis upon the procrastination which marked the provision of the necessary facilities There is a description of the dilemmas confronting British strategists in the lte 1930s they were obliged to plan for war with three powerful enemies knowing that to fight even two would be to court disaster New Zealand s approach to the problem of security is discussed in detail It is shown that far from being complacent

behind the shield of a supposedly all powerful Royal Navy New Zealand leaders were consistently worried by their country's vulnerable position And yet the only possible alternative ally the United States of America could not be counted upon to deal with an aggressive Japan This book is a study of Anglo New Zealand relations in the broad field of naval defence Although primarily dealing with New Zealand's defence policy the book is a necessary introduction to any study of New Zealand's developing role in the world and of the evolution of its foreign policy Inside front cover *Books for College Libraries: History Association of College and Research Libraries, 1988* This third edition lists 50 000 titles that form the foundation of an undergraduate library's collection Twentieth Century International Relations: The international system, 1815-1945 Michael Cox, 2006 The Unholy Alliance Geoffrey Roberts, 1989 *The Longman Handbook of Modern European History, 1763-1997* Chris Cook, John Stevenson, 1998 This 3rd edition of the Longman Handbook of Modern European History now includes full coverage of the events of the mid 1990s after the former Soviet Union broke up into its constituent parts

Modern European History: Chronological and national courses John Santore, 1983 *International Affairs*, 1974

The Registrar General's Statistical Review of England and Wales for the Year ... Great Britain. General Register Office, 1960 **Library of Congress Catalog** Library of Congress, 1970 In Command of France Robert J. Young, 1978 In Command of France combines a detailed survey of French foreign policy during the Nazi period with a careful examination of France's corresponding military planning and preparation France was under control the author argues and credits the civilian and military command with more vision more determination more competence than hitherto recognized **Arsenal of World War II** Paul A. C. Koistinen, 2004 Prolific munitions production keyed America's triumph in World War II but so did the complex economic controls needed to sustain that production Artillery tanks planes ships trucks and weaponry of every kind were constantly demanded by the military and readily supplied by American business While that relationship was remarkably successful in helping the U S win the war it also raised troubling issues about wartime economies that have never been fully resolved Paul Koistinen's fourth installment of a monumental five volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly global war Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945 describing the nation's struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services Koistinen traces the evolution of federal agencies mobilizing for war including the National Defense Advisory Commission the Office of Production Management and the Supply Priorities and Allocation Board and then focuses on the work of the War Production Board from 1942 1945 As the war progressed the WPB and related agencies oversaw the military's supply and procurement systems stabilized the economy while financing the war closely monitored labor relations and controlled the shipping and rationing of fuel and food In chronicling American mobilization Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape

policies for harnessing the economy and how federal agencies were subsequently riven with dissension as New Deal reformers and anti New Deal corporate elements battled for control over mobilization itself As the armed services emerged as the principal customers of a command economy the military industrial nexus consolidated its power and ultimately succeeded in bending the reformers to its will The product of exhaustive archival research Arsenal of World War II shows that mobilization meant more than simply harnessing the economy for war it also involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe *The Longman Handbook of Modern European History, 1763-1985* Chris Cook,John Stevenson,1987 *Understanding U.S. Military Conflicts through Primary Sources* James R. Arnold,Roberta Wiener,2015-11-12 An easily accessible resource that showcases the links between using documented primary sources and gaining a more nuanced understanding of military history Primary source analysis is a valuable tool that teaches students how historians utilize documents and interpret evidence from the past This four volume reference traces key decisions in U S military history from the Revolutionary War through the 21st century conflicts in Afghanistan and Iraq by examining documents relating to military strategy and national policy judgments by U S military and political leaders A comprehensive introductory essay provides readers with the context necessary to understand the relationship between diplomatic documents military correspondence and other documentation related to events that shaped warfare diplomacy and military strategy Once the stage is set the work covers 14 conflicts that are significant to U S history Treatment of each of the conflicts begins with a historical overview followed by a chronology and approximately 30 primary source documents presented in chronological order Each document is accompanied by a description and annotations and by an analysis that highlights its importance to the event or topic under discussion Designed for secondary school and college students the work will be exceptionally valuable to teachers who will appreciate the ready made lessons that fit directly into core curriculum standards **The Registrar-General's Statistical Review of England and Wales** Great Britain. General Register Office,1963 *Bibliographic Index* ,2001
