Terror and Triumph Pat Seward, 2011 World War II explores the elements of the war in broadly chronological order not just on the battlefields but also on home fronts around the world **Silent Film and the Triumph of the American Myth** Paula Marantz Cohen, 2001-05-03 Silent Film and the Triumph of the American Myth is a broad cultural study that connects the rise of film to the rise of America as a cultural center and world power in the twentieth century Cohen argues that through the medium of silent film America was able to sever its literary and linguistic ties to Europe assert its cultural independence and forge a unique form of cultural expression Silent films drew on elements developed in popular forms of representation like photography landscape panoramas and vaudeville performance to create a medium that more accurately represented the American experience **Victory at Sea** Paul M. Kennedy, 2022-04-26 A sweeping lavishly illustrated one volume history of the rise of American naval power during World War II A brilliant and gripping book by a master historian working at the top of his powers Fredrik Logevall Harvard University Paul Kennedy has written a classic in this sweeping narrative account of the desperate struggle to command the seas and America's rise as a superpower during the Second World War John H Maurer U S Naval War College In this engaging narrative brought to life by marine artist Ian Marshall's beautiful full color paintings historian Paul Kennedy grapples with the rise and fall of the Great Powers during World War II Tracking the movements of the six major navies of the Second World War the allied navies of Britain France and the United States and the Axis navies of Germany Italy and Japan Kennedy tells a story of naval battles maritime campaigns convoys amphibious landings and strikes from the sea From the elimination of the Italian German and Japanese fleets and almost all of the French fleet to the end of the era of the big gunned surface vessel the advent of the atomic bomb and the rise of an American economic and military power larger than anything the world had ever seen Kennedy shows how the strategic landscape for naval affairs was completely altered between 1936 and 1946 The Royal Navy and Allies from October 1944 to September 1945 Kenneth Edwards (Commander.), 1945 **V Is For Victory** Craig Nelson, 2023-05-23 Historian Craig Nelson reveals how FDR confronted an American public disinterested in going to war in Europe skillfully won their support and pushed government and American industry to build the greatest war machine in history the arsenal of democracy that won World War II As Nazi Germany began to conquer Europe America's military was unprepared too small and poorly supplied The Nazis were supported by robust German factories that created a seemingly endless flow of arms trucks tanks airplanes and submarines The United States emerging from the Great Depression was skeptical of American involvement in Europe and not ready to wage war Hardened isolationists predicted disaster if the country went to war In this fascinating and deeply researched account Craig Nelson traces how Franklin D Roosevelt steadily and sometimes secretly put America on a war footing by convincing America's top industrialists such as Henry Ford Jr to retool their factories by diverting the

country's supplies of raw materials to the war effort and above all by convincing the American people to endure shortages to work in wartime factories and to send their sons into harm's way. Within a few years the nation's workers were producing thousands of airplanes and tanks, hundreds of warships and submarines. Under FDR's resolute leadership, victory at land and sea and air across the globe began at home in America, a powerful and essential narrative largely overlooked in conventional histories of the war but which in Nelson's skilled authoritative hands becomes an illuminating and important work destined to become an American history classic.

D-Day, 1944 Theodore A. Wilson, 1994. Readers may be astonished at how much scholarly digging and the release of once secret information have transformed the history of this campaign. At times it seems like a whole new war. *New York Times Book Review*. *The Making of American Democracy: 1865-1950* Ray Allen Billington, 1950.

The GI Offensive in Europe Peter R. Mansoor, 1999. The German Wehrmacht was one of the most capable fighting forces the world has ever known but in the end it was no match for the Allies. Some historians contend that the Allies achieved victory through brute force and material superiority. But as Peter Mansoor argues, all of the material produced by US industry was useless without trained soldiers to operate it, a coherent doctrine for its use, and leaders who could effectively command the formations into which it was organized.

Victory at Stalingrad Geoffrey Roberts, 2013-08-21. Victory at Stalingrad tells the gripping strategic and military story of that battle. The hard-won Soviet victory prevented Hitler from waging the Second World War for another ten years and set the Germans on the road to defeat. The Soviet victory also prevented the Nazis from completing the Final Solution, the wholesale destruction of European Jewry which began with Hitler's War of Annihilation against the Soviets on the Eastern Front. Geoffrey Roberts places the conflict in the context of the clash between two mighty powers, their world views, and their leaders. He presents a great human drama, highlighting the contribution made by political and military leaders on both sides. He shows that the real story of the battle was the Soviets' failure to achieve their greatest ambition: to deliver an immediate war-winning knockout blow to the Germans. This provocative reassessment presents new evidence and challenges the myths and legends that surround both the battle and the key personalities who led and planned it.

MacArthur's Airman Thomas E. Griffith, 1998. Thomas Griffith offers a critical assessment of George C. Kenney's numerous contributions to MacArthur's war efforts. He depicts Kenney as a staunch proponent of airpower's ability to shape the outcome of military engagement and a commander who shared MacArthur's strategic vision.

The making of American democracy, 1950. A History of World Civilizations Edward R. Tannenbaum, 1973. *Government and the American economy, 1870-present* David Morris Potter, Thomas G. Manning, 1949.

Victory in Europe, 1945 Arnold A. Offner, Theodore A. Wilson, 2000. In this collection, senior scholars explore the transition from war to uneasy peace, how and why the war ended as it did, whether a different resolution was possible, and if the ensuing Cold War was inevitable.

Corps Commanders of the Bulge Harold R. Winton, 2007. Study of the Battle of the Bulge.

Incredible Century R. J. Unstead, 1974. Our century had been in every sense incredible. When it began, Britain ruled a

world wide empire and the United States played a little part in international affairs No man had flown in a powered aircraft or listened to a radio few had ridden in a motor car or seen a moving picture Medical skill was so rudimentary that the removal of an appendix was a very dangerous undertaking The vast majority of people were poor insecure and dominated by the ruling classes
