1970s Arguments:

Values, Pluralism, and Pragmatism: Themes from the Work of Matthew J. Brown Jonathan Y. Tsou, Jamie Shaw, Carla Fehr, 2025-08-17 This book offers eighteen original historical and philosophical essays focused on values in science scientific pluralism and pragmatism These themes have been central in the work of Matthew J Brown and the book frames these topics through an engagement with Brown s broadly ranging work on values in science The themes of this book are integrated and unified in the pragmatic and value laden ideal of science defended by Professor Brown in his fascinating 2020 book *Science and Moral Imagination* Brown s ideal of moral imagination prescribes that scientists should recognize the contingencies in their work as unforced choices examine morally salient aspects of these decisions recognize the various interests of relevant stakeholders explore and construct alternative options and exercise fair and warranted value judgments to guide those decisions The interdisciplinary essays in this volume engage with different aspects of Brown s philosophical research on scientific values as well as his historical research on figures such as John Dewey and Paul K Feyerabend With a fresh focus on topics such as moral imagination inductive risk and epistemic priority in various socially salient contexts e g artificial intelligence psychiatry segregation research this book is of great interest to a broad audience of researchers working in philosophy of science philosophy of medicine history and philosophy of science and science and technology studies

Immigration Policy from 1970 to the Present Rachel Stevens, 2016-02-19 This book examines national debates on immigration asylum seekers and guest worker programs from 1970 to the present Over the past 45 years contemporary immigration has had a profound impact throughout North America Europe and Australasia yet the admission of ethnically diverse immigrants was far from inevitable In the midst of significant social change policymakers grappled with fundamental questions what is the purpose of immigration in an age of mass mobility Which immigrants should be selected and potentially become citizens and who should be excluded How should immigration be controlled in an era of universal human rights and non discrimination Stevens provides an in depth case study comparison of two settler societies Australia and the United States while drawing parallels with Europe Canada and New Zealand Though contemporary immigration history that focuses on one national setting is well established this book is unique because it actively compares how a number of societies debated vexing immigration policy challenges The book also explores the ideas values and principles that underpin this contentious area of public policy and in doing so permits a broader understanding of contemporary immigration than outlining policies alone

Analysing Performance Patrick Campbell, 1996-04-15 A wide ranging collection of specially commissioned essays by contributors of international standing about key aspects of the performing arts

Playing God? John H. Evans, 2002-02 Technology evolves at a dazzling speed in the field of genetic engineering The public hasn t had much say in advancements in human genetics This asks why and explores social forces leading to thinning out of public debate over genetic engineering

King Arthur in Antiquity Graham Anderson, 2004-03-01 This original and compelling study argues

against the traditional identification of Arthur as a king in Celtic Britain Instead Graham Anderson explores the evidence for two much older figures known to classical writers as kings of Arcadia and Lydia over a millenium before He shows how these kings can be clearly connected with traditional Arthurian characters and adventure including an ancient Gawain a Lady of Shallott and a predecessor of Excalibur and shows that the Arthurian universe found in Welsh tales and French romances is already anticipated in these earliest of Arthurian materials This radical reassessment of the Arthurian legends provides a new perspective on on age old historical puzzle and will provoke debate amongst Classical and Medieval scholars and Arthurian enthusiasts

Grass Roots Emily Dufton,2017-12-05 How earnest hippies frightened parents suffering patients and other ordinary Americans went to war over marijuana In the last five years eight states have legalized recreational marijuana To many continued progress seems certain But pot was on a similar trajectory forty years ago only to encounter a fierce backlash In Grass Roots historian Emily Dufton tells the remarkable story of marijuana s crooked path from acceptance to demonization and back again and of the thousands of grassroots activists who made changing marijuana laws their life s work During the 1970s pro pot campaigners with roots in the counterculture secured the drug s decriminalization in a dozen states Soon though concerned parents began to mobilize finding a champion in Nancy Reagan they transformed pot into a national scourge and helped to pave the way for an aggressive war on drugs Chastened marijuana advocates retooled their message promoting pot as a medical necessity and eventually declaring legalization a matter of racial justice For the moment these activists are succeeding but marijuana s history suggests how swiftly another counterrevolution could unfold
