Records and Briefs*. New York (State).,      **Economic Growth and Fiscal Planning in New York** William Duncombe, 2017-09-08 In an era of federal deficits and struggling municipalities states have emerged as the most significant governmental actors But state governments face the major challenge of fiscal planning in the midst of economic change Roy Bahl and William Duncombe tackle this challenge head on Using New York as a case study they identify looming dangers for state revenue and expenditure planning Bahl and Duncombe begin with the premise that one cannot separate an evaluation of fiscal performance from an evaluation of economic performance Accordingly they describe and analyze the patterns of population employment and personal income growth Following this is a study of state and local government finances in New York since 1970 and a recounting of the fiscal adjustments that were taken in the face of slower and then faster growth in the economy The authors conclude that based on current conditions the state and its local governments are in for fiscal belt tightening They note that the state should take a comprehensive view in planning the development and retrenchment of its government sector The book is thought provoking exhaustively researched and sensibly written Its lessons are applicable everywhere and should be read by all those seeking a route through the tangled thicket of government policy for economic growth      Statistical Reference Index ... Annual, 1990      **New York School Boards**, 1996      **A Checklist of Official Publications of the State of New York** New York State Library, 1991 A monthly compilation of New York State documents acquired by the New York State Library Accumulated annual versions are available electronically Citations are arranged in New York State Document Classification System NYDoCS call number order Each citation is assigned a sequential number beginning with 1 in the first issue of each year      Statistical Reference Index, 1994      **The Standard Periodical Directory**, 1978 This directory may be used to identify specialized trade journals as possible sources of business information or advertising      Statistical Reference Index ... **Development Report**, 1993 This report examines the interplay between human health health policy and economic development Because good health increases the economic productivity of individuals and the economic growth rate of countries investing in health is one means of accelerating development More important good health is a goal in itself During the past forty years life expectancy in the developing world has risen and child mortality has decreased sometimes dramatically But progress is only one side of the picture The toll from childhood and tropical diseases remains high even as new problems including AIDS and the diseases of aging populations appear on the scene And all countries are struggling with the problems of controlling health expenditures and making health care accessible to the broad population This report examines the controversial questions surrounding health care and health policy Its findings are based in large part on innovative research including estimation of the global burden of disease and the cost effectiveness of interventions These assessments can help in setting priorities for health spending The report advocates a threefold approach to health policy for governments in developing countries and in the formerly socialist countries First to foster an economic environment that will enable households to improve their own health Policies for economic growth that ensure income gains for the poor are essential So too is expanded investment in schooling particularly for girls Second redirect government spending away from specialized care and toward such low cost and highly effective activities such as immunization programs to combat micronutrient deficiencies and control and treatment of infectious diseases By adopting the packages of public health measures and essential clinical care described in the report developing countries could reduce their burden of disease by 25 percent Third encourage greater diversity and competition in the provision of health services by decentralizing government services promoting competitive procurement practices fostering greater involvement by nongovernmental and other private organizations and regulating insurance markets These reforms could translate into longer healthier and more productive lives for people around the world and especially for the more than 1 billion poor
