1990 Recommendations Of The International Commission On Radiological Protection Users Edition:

1990 Recommendations of the International Commission on Radiological Protection International Commission on Radiological Protection, 1992 The International Commission on Radiological Protection issued its last basic recommendations in 1977 The recommendations have been used widely throughout the world to limit exposure of both radiation workers and members of the public to ionising radiation Supplementary statements to the 1977 recommendations were issued when necessary by the Commission but developments in the last few years have made it necessary to issue a completely new set of recommendations officially adopted in November 1990 In publishing these recommendations the Commission has had three aims in mind to take account of new biological information and of trends in the setting of safety standards to improve the presentation of the recommendations and to maintain as much stability in the recommendations as is consistent with the new information In order to make the 1990 recommendations more accessible to individuals this Users Edition contains the main text of the original recommendations which includes sufficient explanatory material to make clear the underlying reasons for policy makers but omits the annexes which contained detailed scientific information on specific points for specialists The index has been improved and made more comprehensive

1990 Recommendations of the International Commission on Radiological Protection, 1992 *Radiation Protection In Diagnostic X-Ray Imaging*, *Personal Protective Equipment for Chemical, Biological, and Radiological Hazards* Eva F. Gudgin Dickson, 2012-09-25 Personal protective equipment PPE is critical for those dealing with toxic infectious and radioactive materials An easily accessible guide for professionals and researchers in all PPE fields this book takes a fresh look at how PPE is designed selected and used in today's emergency response environment where users may need to be protected against deliberately used chemical biological or radiological agents in terrorism or warfare scenarios as well as more traditional hazards Covering the physics chemistry and physiology of these hazards the book explains how PPE protects from various forms of hazards as well as how to use this information to select PPE against these highly hazardous substances for first responder or military users The design of PPE and components plus relevant performance and evaluation standards are also discussed
