Wolfgang Filc, Claus Köhler

1990s Slump Causes Cures:

Macroeconomic Causes of Unemployment: Diagnosis and Policy Recommendations / Wolfgang Filc, Claus Köhler, 2015-03-03 This conference volume deals with one of the most severe economic social and political problems major European economies face since the early nineties the problem of lasting high unemployment Contrary to the current German discussion solely concentrating on microeconomic explanations and therapy recommendations this volume presents papers based on various macro economic points of view showing different ways out of the employment crisis Apart from renowned German economists some well known international academics participated in the 1998 Berlin symposium to learn from experience in other countries The first chapter contains the main standard textbook models and paradigms explaining lasting high unemployment The question in the second chapter is if it is possible to fight unemployment with the help of macro policy on a purely national basis in the presence of global markets The third chapter indicates possible effects of misalignments in financial markets on economic growth and employment The contributions of the fourth chapter present experiences of other countries which have succeeded in recent years in lowering their unemployment rates The question at issue is if these concepts can be transferred to Germany The topics of the concluding chapter are practical macroeconomic starting points for sustainable employment growth in Europe The methods contradict supply side arguments for the stabilisation of employment predominant in the German discussion Attention is focused on relations between the role of monetary and fiscal policy in close conjunction with wage policy Furthermore it is made evident that in global markets a theoretical macroeconomic concept as a base for sustainable employment is not very promising without enhanced international co operation **From Malthus' Stagnation to Sustained Growth** Bruno Chiarini, Paolo Malanima, 2012-11-29 A detailed exploration of the influence and utility of Thomas Malthus model of population growth and economic changes in Europe since the nineteenth century This important contribution to current discussions on theories of economic growth includes discussion of issues ranging from mortality and fertility to natural resources and the poverty trap *The Privatization of Public Utilities* Mario Baldassarri, A. Macchiati, D. Piacentino, 2016-07-27 The privatization of public utilities raises several complex issues The privatization decision involves not only the transfer of ownership from the public to the private sector and thus the design of appropriate selling procedures with regard to valuation of assets flotation of shares etc but also and most importantly it appears to require the adjustment of significant features of the industrial organization and the regulatory framework This volume focuses on the two related questions of why and how to proceed to privatization [The Coming of Age of Information Technologies and the Path of Transformational Growth](#) Davide Gualerzi, 2009-10-16 In this book Davide Gualerzi employs the concept of transformational growth to explore the investment driven cycle of expansion of the 1990s in the US economy and of the role played by the ICT sector The book articulates a view of demand led growth in which the focus is on effective demand the composition of the growth process and the link between changing composition and expansion

The Psychology of Working David Blustein,2013-01-11 In this original and major new work David Blustein places working at the same level of attention for social and behavioral scientists and psychotherapists as other major life concerns such as intimate relationships physical and mental health and socio economic inequities He also provides readers with an expanded conceptual framework within which to think about working in human development and human experience As a result this creative new synthesis enriches the discourse on working across the broad spectrum of psychology s concerns and agendas and especially for those readers in career development counseling and policy related fields This textbook is ideal for use in graduate courses on counseling and work or vocational counseling

The 1990s Slump Mario Baldassarri,Luigi Paganetto,Edmund S. Phelps,2016-07-27 At the beginning of the 1990 s unemployment grew in all industrialized countries the essays in this collection focus on the causes and cures of this worrying phenomenon The volume starts by analysing the disparities in the different national experiences and then focusing on European unemployment This is followed by more theoretical discussions using econometric models The volume ends with policy recommendations

Public Procurement's Place in the World G. Piga,F. Decarolis,M. Frey,2014-08-17 This volume addresses different issues related to green innovation procurement as well as exploring the challenges involved in public procurement It offers a broad array of perspectives addressing both general abstract problems of optimal public procurement and concrete cases of national or even local public procurement systems

Environmental Taxes and Fiscal Reform L. Castellucci,A. Markandya,2012-11-30 A review of the literature on environmental taxes focusing on European experiences and analysing how such taxes can contribute to green causes as well as reducing the tax burden from ordinary taxation The authors examine the potential double dividend from tax reform for helping the environment reducing unemployment and encouraging growth

Maffeo Pantaleoni Mario Baldassarri,2016-07-27 This collection of papers proposes to trace the professional and personal fortunes of Maffeo Pantaleoni 1857 1924 an eminent and controversial Italian economist from the liberalist culture which in the early twentieth century perceived the shortcomings and dangers of the nascent monopolist concentrations He was one of the founders of what we can today call the Italian school of economics and finance These contributions examine his life thought and works and his reputation since his death His vital influence on economic history
