

Environmental Sustainability Challenges in Cotton Value Chain *How is India Responding to these Challenges?*

Purna Chandra Jena*

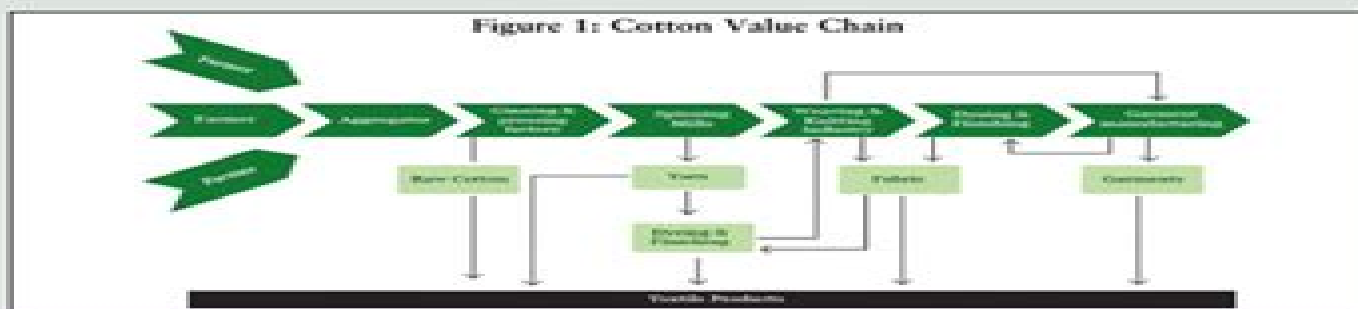

Promotion of environmentally-sustainable agriculture, in general, and cotton, in particular has emerged as a major policy concern globally. The entire spectrum of activities from cotton production, leading up to consumption, is no exception to this global trend. An assessment of the cotton value chain reveals a mix of economic and environmental factors which need policy attention. Against this backdrop, this Briefing Paper has tried to shed light on the role of Indian government policy and regulatory framework spanning mid-80s till now, to ensure delivery of better and sustainable cotton production and consumption along the value chain.

Introduction

Promotion of environmentally-sustainable agriculture has emerged as a major policy concern globally. The entire spectrum of activities from cotton production leading up to consumption is no exception to this global trend. An assessment of the cotton value chain (Figure 1) reveals a mix of economic and environmental factors which need policy attention. On the economic side, the issues mainly related to inefficiency of the production process include choice of seeds, harvesting techniques and inefficiencies arising on account of post-harvest storage and

transportation. On the environmental sustainability dimension, a number of factors mainly relate to the form of trash content as well as unsustainable use of inputs, such as water, pesticides and fertilisers.

Against this backdrop, accelerated demand for cotton, globally, has led to more than threefold increase in its production since 1950s.¹ This increase in production has been achieved through intense input application, use of which has most often overlooked environmental impact. Some of these unsustainable production practices include indiscriminate use of pesticides and fertilisers,
