

## Full-length Nude

The human body stretched to its full length in a relaxed pose gives an impression of elegance and luxury. The full-length nude can be posed compositionally in a variety of ways, either being used to fill the frame and create a sense of tension, or as an element in a more spacious composition where the feeling may be one of relaxation.

**Technical Details**  
 Vogue Station Camera with an Elmo overhead lens  
 and Lightbulb #12 100 W/110 V

Designed by Ben Jeffe

## Seeing

The model was lit with a light source with a narrow beam of light. The subject was lit while the camera's shutter remained open. The carefully planned the image, working out how much illumination to give each part of the model's body.

## Thinking

The idea was to create a high contrast effect to dramatically separate the girl's body from the dark background by outlining her undisturbed form. Jeffe designed the studio so that no other lighting occurred during the time exposure. This allowed that the background registered as a pure black area.

## Acting

During the exposure time of one minute the photographer moved the light slowly across the model's body to provide even lighting. A little extra time was spent illuminating her face and hair to bring out the detail in them.

## Rule of Thumb

With the power that is available from today's studio lighting, trying to create an area of complete darkness has sometimes been a problem. Better use of power output and lighting accessories is one answer. But avoid an important rule being, reflective-free surroundings. Dark background paper or black velvet draped behind the model may help to completely see shadows.
