Between Science And Literature An Introduction To Autopoetics:

Between Science and Literature Ira Livingston, 2010-10-01 *Between Literature and Science* follows through to its emerging 21st century future the central insight of 20th century literary and cultural theory that language and culture along with their subsystems and artifacts are self referential systems The book explores the workings of self reference and the related performativity in linguistic utterances and assorted texts through examples of the more open social discursive systems of post structuralism and cultural studies and into the sciences where complex systems organized by recursive self reference are now being embraced as an emergent paradigm This paradigmatic convergence between the humanities and sciences is autopoetics adapting biologist Hubert Maturana s term for self making systems and it signals a long term epistemological shift across the nature culture divide so definitive for modernity If cultural theory has taught us that language because of its self referential nature cannot bear simple witness to the world the new paradigmatic status of self referential systems in the natural sciences points toward a revived kinship of language and culture with the world language bears witness to the world The main movement of the book is through a series of model explications and analyses operational definitions of concepts and terms more extended case studies vignettes and thought experiments designed to give the reader a feel for the concepts and how to use them while working to expand the autopoetic interneer by putting cultural self reference in dialogue with the self organizing systems of the sciences Along the way the reader is introduced to self reference in epistemology Foucault sociology Luhmann biology Maturana Varela Kauffman and physics and cosmology Smolin Livingston works through the fundamentals of cultural literary and science studies and makes them comprehensible to a non specialist audience

The Poetry of Raymond Carver Sandra Lee Kleppe, 2016-02-24 Best known as one of the great short story writers of the twentieth century Raymond Carver also published several volumes of poetry and considered himself as much a poet as a fiction writer Sandra Lee Kleppe combines comparative analysis with an in depth examination of Carver s poems making a case for the quality of Carver s poetic output and showing the central role Carver s pursuit of poetry played in his career as a writer Carver constructed his own organic literary system of autopoetics a concept connected to a paradigm shift in our understanding of the inter relatedness of biological and cultural systems This idea is seen as informing Carver s entire production and a distinguishing feature of Kleppe s book is its contextualization of Carver s poetry within the complex literary and scientific systems that influenced his development as a writer Kleppe addresses the common themes and intertextual links between Carver s poetry and short story careers situates Carver s poetry within the love poem tradition explores the connections between neurology and poetic memories and examines Carver s use of the elegy genre within the context of his terminal illness Tellingly Carver s poetry which has aroused slight interest among literary scholars is frequently taught to medical students This testimony to the interdisciplinary implications of Carver s work suggests the appropriateness of Kleppe s culminating discussion of Carver s work as a bridge between the fields of literature and medicine

The Lives of Texts Andrzej Kowalczyk, Katarzyna Pisarska, 2014-07-24 The Lives of Texts Exploring the Metaphor examines various instances of textual subsistence implied by the title Drawing on the parallel between a text and a living organism the contributors analyze various literary texts ranging from the Middle Ages to postmodernity as well as film adaptations and the graphic novel Apart from the works of canonical writers attention is also drawn to some long forgotten authors along with the most recent instances of popular literature and culture The exploration of the title metaphor allows the contributors to trace life like phenomena e g textual birth maturation dissemination death and resurrection in the texts of writers so remote from each other as Layamon Thomas More Mary Shelley Charles Williams Ursula Le Guin A S Byatt Peter Ackroyd Iain Banks J K Rowling or Neil Gaiman

Cosmos, Values, and Consciousness in Latin American Digital Culture Angelica J. Huizar, 2020-05-19 This book understands digital cultural production of electronic literatures and digital art by looking at electronic and digital works that produce subjective positionality clouded knowledges of quantum theories and metaphysical patterns grounded in a cultural ideology This book underlines a conceptual framework for understanding how digital media impacts reading approaching and even interpreting social reality The qualitative analyses interpret the current zeitgeist and the works selected speak of the diverse sometimes regionalized and often multi ethnic reality of the Latin American experience The analyses elaborate on how artists reflect both the world they live in and a universal consciousness These artists are not simply digitalizing literature and these works are more than techy creations rather they make us think of other directions and connections

Connecting Literature and Science Jay A. Labinger, 2021-11-18 This book presents a case for engagement between the sciences and the humanities The author a professional chemist seeks to demonstrate that the connections between those fields of intellectual activity are far more significant than anything that separates them The book combines a historical survey of the relationships between science and literature with a number of case studies that examine specific scientific episodes several drawn from the author s own research juxtaposed with a variety of literary works spanning a wide range of period and genre Dante to detective fiction War and Peace to White Teeth to elicit their common themes The work argues for an empirical non theory based approach one that is closely analogous to connectionist models of brain development and function and that can appeal to general readers as well as to literary scholars and practicing scientists who are open to the idea that literature and science should not be compartmentalized
