Between Sky And Earth:

Nut and Geb: Sky, Earth, and the Egyptian Afterlife AJ Carmichael, 2026-03-24 Between the vast curve of the heavens and the fertile ground beneath the ancient Egyptians envisioned a world held in perfect balance In Nut and Geb Sky Earth and the Egyptian Afterlife this forgotten structure of reality is brought back to life through the evidence carved into tombs painted onto coffins and preserved in sacred texts The sky was not an empty expanse but a living goddess who swallowed the sun and gave birth to it each day The earth was not inert soil but a divine force of stability inheritance and renewal Together they created the space in which existence itself could unfold This book takes you deep into that space into the architecture of the cosmos as the Egyptians understood it Through careful analysis of archaeological remains and ancient writings you will discover how the separation of sky and earth shaped ideas of death rebirth kingship and cosmic order From the star filled ceilings of royal tombs to the intimate interiors of painted coffins this is a journey into a civilization that did not merely imagine the afterlife it built it Perfect for readers drawn to ancient mysteries archaeology and the deeper structures of belief this is the story of a world held apart and the eternal balance that sustained it

Between Heaven and Earth

Maxime A. Collin, 2021-06-07 Our understanding of modern power politics usually relies on simple linear narratives which tend to obfuscate complex systems Sociological and historical connections in particular are eschewed in favor of national histories and short term analysis Yet actors tend to found their intents and actions on complex kinetics rooted in their core identities To study the way identity is built and expressed opens the way for a more comprehensive analysis of actors on the international stage through a recontextualization of social competition and the mechanisms of fear hate and sacrifice These kinetics also shine a light on the new contemporary facets of power which no longer exists as a unilateral flux but rather as a combination of action expression and shaping of the superstructure The example of the East China Sea one of the most crucial lynch points of the 21st century offers concrete evidence of this model s heuristic and prospective value and opens the way for further development of analysis of complex systems as a science
