Between Empire And Nation:

Citizenship between Empire and Nation Frederick Cooper, 2014-07-21 A groundbreaking history of the last days of the French empire in Africa As the French public debates its present diversity and its colonial past few remember that between 1946 and 1960 the inhabitants of French colonies possessed the rights of French citizens Moreover they did not have to conform to the French civil code that regulated marriage and inheritance One could in principle be a citizen and different too Citizenship between Empire and Nation examines momentous changes in notions of citizenship sovereignty nation state and empire in a time of acute uncertainty about the future of a world that had earlier been divided into colonial empires Frederick Cooper explains how African political leaders at the end of World War II strove to abolish the entrenched distinction between colonial subject and citizen They then used their new status to claim social economic and political equality with other French citizens in the face of resistance from defenders of a colonial order Africans balanced their quest for equality with a desire to express an African political personality They hoped to combine a degree of autonomy with participation in a larger Franco African ensemble French leaders trying to hold on to a large French polity debated how much autonomy and how much equality they could concede Both sides looked to versions of federalism as alternatives to empire and the nation state The French government had to confront the high costs of an empire of citizens while Africans could not agree with French leaders or among themselves on how to balance their contradictory imperatives Cooper shows how both France and its former colonies backed into more national conceptions of the state than either had sought

China from Empire to Nation-State Wang Hui, 2014-10-14 This translation of the Introduction to Wang Hui's Rise of Modern Chinese Thought 2004 makes part of his four volume masterwork available to English readers for the first time A leading public intellectual in China Wang charts the historical currents that have shaped Chinese modernity from the Song Dynasty to the present day and along the way challenges the West to rethink some of its most basic assumptions about what it means to be modern China from Empire to Nation State exposes oversimplifications and distortions implicit in Western critiques of Chinese history which long held that China was culturally resistant to modernization only able to join the community of modern nations when the Qing Empire finally collapsed in 1912 Noting that Western ideas have failed to take into account the diversity of Chinese experience Wang recovers important strains of premodern thought Chinese thinkers theorized politics in ways that do not line up neatly with political thought in the West for example the notion of a Heavenly Principle that governed everything from the ordering of the cosmos to the structure of society and rationality itself Often dismissed as evidence of imperial China's irredeemably backward culture many Neo Confucian concepts reemerged in twentieth century Chinese political discourse as thinkers and activists from across the ideological spectrum appealed to ancient precedents and principles in support of their political and cultural agendas Wang thus enables us to see how many aspects of premodern thought contributed to a distinctly Chinese vision of modernity *From Empire to Nation* Rupert
