## **Between Memory And Experience In Landscape And Architecture:**

Landscapes of Memory and Experience Jan Birksted,2012-12-06 It has been argued that the history of landscape and of gardens has been marginalized from the mainstream of art history and visual studies because of a lack of engagement with the theories methods and concepts of these disciplines This book explores possible ways out of this impasse in such a way that landscape studies would become pivotal through its theoretical advances since landscape studies would challenge the underlying assumptions of traditional phenomenological theory Thus the history and theory of twentieth century landscape might not only once again share concepts and methods with contemporary art and design history but might in turn influence them A complementary sequel to *Relating Architecture to Landscape* this volume of essays explores further areas of interest and discussion in the landscape architecture debate and offers contributions from a team of well known researchers teachers and writers The choice of topics is wide ranging and features case studies of modern and contemporary schemes from the USA Far East and Australasia

JACKET **US Public Memory, Rhetoric, and the National Mall** Roger C. Aden,2018-04-26 US Public Memory Rhetoric and the National Mall examines the nation s front yard understanding it as both a public face the United States presents to the world and a site where its less apparent moral story is told This book provides a uniquely thorough interdisciplinary and integrated examination of how the National Mall shares a moral story of the United States and in so doing reveals the soul of the nation The contributors explore 11 different memorials monuments and museums found across the Mall considering how each rhetorically remembers a key element of the nation s past what the rhetorical memory tells us about the nation s soul and how each site must thus be understood in relation to the commemorative landscape of the Mall Geography of Time, Place, Movement and Networks, Volume 3 Stanley D. Brunn,2024-05-23 This volume discusses the intersections of multiple human journeys and the importance of places and place settings such as battlefield re enactments heritage fairs pilgrimage sites and faith journeys The chapters in this book describe among others racial history tourism music festivals which are frequent time journeys attracting local and regional audiences as well as art journeys displayed in museums whereby place plays an important role in how journeys of the soul culture and state are intersected displayed and remembered The book also provides insight into how the worlds of art narratives and images are evident in how youth draw and depict climate change re inventing the past for commercial tourism income and re interpreting history for contemporary cultures It shows how global warming is also a journey that is both intellectual and environmental and how politics is an important part of any constructed and reconstructed journey Urban Memory in City Transitions Ali Cheshmehzangi,2021-04-02 As a continuation of Identity of Cities and City of Identities this book covers the arguments around the memory experience cognition nexus concerning palimpsests and urban places As cities experience transitional phases of growth development decline and decay the author urges considering the notion of urban memory in place making strategies and design decision making processes These explorations would add value to primary fields of architecture architectural history cognitive science human geography and urbanism Divided into eight chapters this book puts together a comprehensive knowledge of urban memory in city transitions By studying urban memory the author delves into conceptions of mental mapping knowledge of environments cognition of places and the perceptual dimension of urbanism Undoubtedly urban memory plays a significant part in the future movements of humanistic urbanism Given the significances of scale pace and mode of city transitions globally we should remember who are the ultimate users of those living environments Therefore in this book the author debates two contradictions of memory of place vs place of memory and significance of place vs place of significance Each of these is believed to be a paradox of its own indicating places are significant through the systematic networks of cities

memories are meaningful through the neural information processing and place memories are the essence of urban identities. The book's ultimate goal is to demonstrate the effectiveness of the space-time frame of place in making memorable places. Through the comprehensive explorations of many global examples, we can evaluate the significance of place in mind more carefully. This is narrated based on the recognition of nostalgia in cities, socio-temporal qualities in places, and the network of processes in our minds. In return, the aim is to provide new knowledge to make memorable cities enhance social experiences and capture and value the significance of place in mind.

From Sites of Memory to Cybersights Ingrid Gessner, 2007. This interdisciplinary study explores the legacies of Japanese American World War II internment experiences and the factors influencing the construction and mediation of cultural memory and national ethnic identity in the United States. It discusses issues of contested memory and shows how once repressed historic events are selectively commemorated or even erased. By focusing on representations of Japanese American internment experiences, recovered, reframed, or created since the 1980s, the study acknowledges that these experiences continue to be reevaluated in a climate of ethnic politicization. Covering sites of memory ranging from historic places of Japanese American internment to memorials built both at centers of Japanese American cultural life as well as at centers of national cultural identity, the study also critically approaches sites or rather sights in cyberspace that may be visited only virtually, thus taking the scholarship of American memory studies into the digital realm.
