**Representing Qualitative Research** Maria K. E. Lahman, 2021-08-25 This book addresses foundational areas of qualitative writing such as journal articles and dissertations aesthetic representations including poetry and autoethnography publishing and reflexivity in representation in one practical and engaging text based on real experiences Author Maria K E Lahman draws on her experiences as a qualitative research professor and writing instructor and as someone who has published widely in scholarly journals employing both traditional and more innovative forms of writing The first part of the book covers writing tips how to represent data how to write a qualitative thematic journal article how to write a qualitative dissertation and provides guidance on the publication process The second part encourages the qualitative researcher to move beyond traditional forms of writing and consider how qualitative research can be represented more aesthetically as poems autoethnographies and visually The book concludes with a chapter on reflexivity in research representations Throughout the author provides vivid examples from her own work and that of graduate students and colleagues

**Finance Fictions** Arne De Boever, 2018-03-06 Finance Fictions takes the measure of what it means to live in a world ruled by high finance by examining the tension between psychosis and realism that plays out in the contemporary finance novel When the things traded at the center of the economy cease to be things at all but highly abstracted speculations how do we come to see the real What sorts of narrative can accurately approach the actual workings of a neoliberal economy marked by accelerating cycles of market crashes economic and political crisis and austerity Revisiting such twentieth century classics of the genre as Tom Wolfe's *Bonfire of the Vanities* and Bret Easton Ellis's *American Psycho* De Boever argues that the twenty first century is witnessing the birth of a new kind of realistic novel that can make sense of complex financial instruments like collateralized debt obligations credit default swaps and digital algorithms operating at speeds faster than what human beings or computers can record If in 1989 Wolfe could still urge novelists to work harder to tame the billion footed beast of reality today's economic reality confronts us with a difference that is qualitative rather than quantitative a new financial ontology requiring new modes of thinking and writing Mobilizing the philosophical thought of Quentin Meillassoux in the close reading of finance novels by Robert Harris Michel Houellebecq Ben Lerner and less well known works of conceptual writing such as Mathew Timmons *Credit* Finance Fictions argues that realism is in for a speculative update if it wants to take on the contemporary economy and if whose implications turn out to be deeply political Part literary study and part philosophical inquiry Finance Fictions seeks to contribute to a new mindset for creative and critical work on finance in the twenty first century

**Prehistoric Digital Poetry** Christopher Thompson Funkhouser, 2007-06-24 Explores pioneering works of digital poetry and demonstrates how technological constraints that would seemingly limit the

aesthetics of poetry have instead extended and enriched poetic discourse For the last five decades poets have had a vibrant relationship with computers and digital technology This book is a documentary study and analytic history of digital poetry that highlights its major practitioners and the ways that they have used technology to foster a new aesthetic Focusing primarily on programs and experiments produced before the emergence of the World Wide Web in the mid 1990s C T Funkhouser analyzes numerous landmark works of digital poetry to illustrate that the foundations of today s most advanced works are rooted in the rudimentary generative visual and interlinked productions of the genre s prehistoric period Since 1959 computers have been used to produce several types of poetic output including randomly generated writings graphical works static animated and video formats and hypertext and hypermedia Funkhouser demonstrates how hardware programming and software have been used to compose a range of new digital poetic forms Several dozen historical examples drawn from all of the predominant approaches to digital poetry are discussed highlighting the transformational and multi faceted aspects of poetic composition now available to authors This account includes many works in English and other languages which have never before been presented in an English language publication In exploring pioneering works of digital poetry Funkhouser demonstrates how technological constraints that would seemingly limit the aesthetics of poetry have instead extended and enriched poetic discourse As a history of early digital poetry and a record of an era that has passed this study aspires both to influence poets working today and to highlight what the future of digital poetry may hold
