## Behind The Border:

**Border and Behind-the-Border Trade Barriers and Country Exports** Azim M. Sadikov, 2007-12 How do signatures required for exporting and business registration procedures affect the volume and composition of country's exports To answer this question I develop a model where a country can export two types of products differentiated and homogeneous I show that export signatures and registration procedures reduce overall exports by increasing transaction costs The impact however varies across goods according to the product's degree of differentiation the lack of price data on differentiated products due to their heterogeneity makes them more sensitive to export signatures Regressions show that each extra signature exporters have to collect before a shipment can take place reduces aggregate exports by 4.2 percent The impact is large equivalent to raising importer's tariff by 5 percentage points Furthermore each signature lowers exports of differentiated products by 4.5 percent more than exports of homogeneous goods I find evidence that business registration procedures affect exports of differentiated products only

book discusses contemporary constellations of international politics and global transformation It offers guidance on how to conceptualize the complexity of current global changes and practical policy advice in order to promote an open global society In the light of today's challenges the author reinterprets the main argument of the philosopher Karl Popper in *The Open Society and Its Enemies* Based on this framework and new empirical evidence the book discusses the thesis of an ongoing Third World War triggered by fundamental deficits in nation building occurring primarily within states and not between them and accelerated by asymmetric forms of warfare and Islamist totalitarianism The book also explores various threats to the global order such as the paradox of borders as barriers and bridges the global effects of the youth bubble in many developing countries and the misuse of religious interpretation for the use of political violence Lastly the author identifies advocates and supporters of a liberal multilateral and open order and argues for a reinvention of the Western world to contribute to a revival of a liberal global order based on mutual respect and joint leadership
