## **Behind The Myth Of European Union Prospects For Cohesion:**

*Behind the Myth of European Union* Ash Amin, John Tomaney, 2002-06-01 The vision of the original architects of the European Community was to create a Europe of economic prosperity and social harmony Economic integration has come ever closer but sustained growth and a reduction in social disparities seen as far away as ever This book examines the prospects for the real cohesion in Europe and find that far from promoting it many of the Community's current policies are divisive The neo liberal philosophy at the moment is producing policies which favour relatively wealthy regions and major corporations at the expense of less favoured regions and peoples

Converging Europe Dr Ipek Eren Vural, 2013-03-28 *Converging Europe* evaluates the impact of European integration on social policy development since the launch and re launch of the Lisbon strategy discussing the challenges posed by the still unfolding global economic crisis of 2007-2009 Given the unsettling economic conditions does European coordination of social policies generate more social cohesion and integration or growing xenophobia nationalism and exclusion Informed by diverse theoretical perspectives this book brings together a team of international experts working on an extensive range of policy issues central to the Lisbon agenda such as labour market policies social protection systems and social exclusion poverty Contributions assess the interfaces between European integration the Lisbon strategy and social policy in three groups of countries related to the EU old member states the new member states and a candidate country Turkey The richness of content and data allows rigorous analysis and critical comparative insights not only on the social outcomes of the Lisbon strategy but also more broadly on the dynamics and dimensions of European social policy Pioneering the scholarly reflections on the repercussions of the global economic crisis of 2007-2009 for both the road map drawn at Lisbon and viability of national systems of social provision in Europe this book is an important acquisition for policy makers and academics alike

*Political Theory and the European Union* Michael Nentwich, Albert Weale, 2003-09-02 The contributors to this book examine the issues of constitutional choice that face the governments and citizens of today's Europe Divided into three sections this study addresses questions of political legitimacy and the meaning of democratic deficit in the EU the reality of what institutional reforms and decision making processes are possible and the rights of citizenship and values that should be protected

Bargaining with Multinationals H. Loewendahl, 2001-07-19 In *Bargaining with Multinationals* Loewendahl scrutinises the relationship between multinational companies regional development and governments using an international political economy framework of bargaining between government and multinationals He critically analyses the role of foreign investment in economic development and examines how governments can link inward investment to regional economic development Based on extensive use of data interviews and case studies of Siemens and Nissan's UK investment the book shows why MNCs have invested in the UK in the past how they bargained with the government and what the impact was on the national and regional economies In particular through linking the strategy of multinationals to the location advantages of the UK it is argued that labour

flexibility and incentives were crucial to investment decisions Loewendahl recommends a framework to integrate endogenous and exogenous approaches to developments and proposes a greater role for the region and the EU to control incentives and monitor multinationals

**European Union Politics** Michelle Cini,2007 With its established authority and reputation the new edition is an invaluable resource Michelle Cini has brought together a team of international contributors each specialising in a different field of EU politics The book is divided into five parts and deals with the history of the European integration process theories of European integration the European institutions a select number of European policy areas and issues of relevance to the study of EU politics The second edition has been updated throughout to reflect recent developments and there are four new chapters on the constitutional treaty CFSP and ESDP the single market and public opinion This book is supported by a cutting edge Online Resource Centre Student resources Interactive timeline BRAND NEW HE ONLINE RESOURCE Interactive map of Europe with facts key dates and web links for all the EU countries BRAND NEW HE ONLINE RESOURCE Maps Case studies Web links Information on key articles and books Flashcard glossary Multiple Choice Questions Lecturer resources PowerPoint slides

**Human Rights and Ocean Governance** Mara Ntona,2023-12-12 This book argues for the utility of human rights in the practice of ocean governance Maritime spatial planning MSP has become the dominant marine management paradigm with MSP frameworks already at various stages of elaboration and implementation in more than half of all coastal states However as experience with MSP accrues a central systemic shortcoming has become apparent insofar as the normative frameworks that underpin MSP tend to be grounded in a rationalistic and economistic worldview The result is a post political neoliberal approach to the implementation of MSP which favours technocratic fixes to complex societal problems over efforts to address underlying issues of power and inequality Building upon the new field of critical MSP studies this book offers a much neglected legal contribution More specifically it analyses the extent to which law and particularly human rights law can be utilised to meaningfully challenge the unjust patterns of human ocean interaction that MSP preserves or creates and so provide a vehicle for the formulation and realisation of transformative blue futures The book looks to human rights as norms that are uniquely capable of bringing into relief the values cause and effect relationships and uncertainties that prevailing capitalist industrial framings of the ocean tend to downplay or worse disregard And so from a more pragmatic viewpoint the book argues that the policy and advocacy tools associated with human rights can be used within MSP processes to foster patterns of human ocean interaction which are more conducive to social and environmental justice This book will be of interest to legal and planning scholars geographers and others concerned with ocean governance and the blue turn in the social sciences and humanities more generally

Mobilizing Regions, Mobilizing Europe Sebastian M. Buettner,2013-10-23 Regional development strategies are becoming more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national

space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M B ttner studies regional mobilization in contemporary Europe from a new and innovative perspective He highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas

**Beyond Benefit Cost Analysis** Domenico Patassini,Donald Miller,2017-11-30 Illustrated by case studies from Europe North America and the Middle East this book examines how non market values can be identified measured and incorporated into planning evaluation methodologies The traditional means of assessing planning options benefit cost analysis requires that all effects be expressed in monetary terms and this volume offers alternative approaches It presents strategies for accomplishing the major purposes of planning evaluation including the provision of an explicit replicable basis for public assessment in alternative ways Growing demand for public involvement and for accountability in decision making requires better means for accommodating a broad range of concerns in planning evaluation Methodologies examined include effectiveness cost and multicriteria analysis and the book explores how these have been applied in practice in developing special issue plans complex regional development strategies and efforts to analyze the environmental justice implications of major infrastructure projects Use of scenarios and problem structuring methods by stakeholder groups are also explored
