Environmental Risk and Corporate Behaviour Rui Xue, Haiyue Liu, Ruidong Chang, Di Bu, Shiyang Hu, 2024-09-19 The accelerating global climate change risk highlights the importance of a quick transition towards a cleaner world Although steady progress has already been made globally substantial improvement cannot be achieved without sufficient financial support especially during the post COVID 19 recovery period where countries worldwide have to prioritize the economic recovery which might limit the support for climate change mitigation and adaptation Firms are the main greenhouse gas emitters and their contributions to the green transition thus are of vital importance to achieving a low carbon transition However firms normally lack motivation to make green efforts even worse the business lockdowns and the supply chain disruptions during the pandemic have further weakened their already minimal commitment to mitigating climate change risks

An Introduction to Social Psychology Luther Lee Bernard, 1926 The present Introduction to Social Psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given It seems to the writer that the time has arrived when schools of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically In a sense social psychology overlaps a very large portion of social science and of psychology and education In this respect it is central to all psychological and social science disciplines This fact necessarily renders the content of social psychology voluminous It is no longer possible to treat this subject adequately in small compass The text books which have so far appeared although for the most part excellent from their several viewpoints are nevertheless but partial treatments So notably true is this that there exists a marked controversy as to what properly constitutes social psychology In Part I of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole Originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments sociology If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which

care to use it in this way That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published Preface PsycINFO Database Record c 2006 APA all rights reserved

Psychological and Behavioral Decision Making of Green Consumption Ruyin Long,Hong Chen,Xiuping Li,2022-11-11 **Experiencing the Environment** Seymour Wapner,2012-12-06

The purpose of this volume is to explore theory problem formulation and methodology in experiencing the environment In this embryonic field the writings of a number of individuals already stand out as representative of distinctive viewpoints In order to facilitate further development of the field a conference was proposed to gather in one place representatives of a number of major viewpoints with regard to the embryonic field of environmental psychology It was hoped that a colloquy among such representatives would facilitate a clarification of the similarities and differences between the various perspectives and might enable proponents of any given point of view to benefit from the insights of others with different orientations Hopefully it might also promote a greater articulation for this emerging field of inquiry With these ends in mind the sponsors of the conference asked the various prospective participants to present their theoretical positions and representative research illustrative of those positions Some of the perspectives represented at the conference emphasized the point that the construal of phenomena depends heavily on the values and needs of perceivers Implicit in this kind of position is the thesis that anyone who seeks to describe a complex happening is likely to shape it in terms of presup positions biases etc that may not be shared by others **Theory**

Implications for sustainable product development in the outdoor apparel market Andreas Jesda Jügelt,2021-03-26 Diploma Thesis from the year 2010 in the subject Business economics Market research grade 1 3 Technical University of Munich language English abstract Over the past couple of decades environmental and social issues started to have a raising impact on corporate and marketing strategies Fundamental changes in business environments like rising public awareness about environmental issues tougher national and international regulations and foreseeable depletion of natural resources within the next few decades will sooner or later force the big players from all industries to rethink their strategies Thus they need to evaluate innovative product solutions that save scarce natural resources and reduce energy consumption during the entire product life cycle Taking corporate responsibility developing sustainable value chains and moving away from oil based resources will be of growing importance Thus incorporating sustainability into value chains increasingly becomes an issue across all industry sectors from automobiles to textiles The engagement in sustainability marketing is an opportunity which helps to create a long term competitive advantage The challenge on the other hand is understanding the complexity of green consumerism and to implement the right strategic measures to overcome motivational issues to sell green products successfully The fact that marketing should combine environmental social and economic goals has also been realized in the fashion industry as the authors research and interviews with industry veterans proves This thesis is located at the interface between sustainability marketing and conservation psychology The purpose of this publication is to further the understanding of green consumerism in the context of environmentally friendly clothing
